This book has been published thru the dedicated services of an entirely unpaid communal staff of people, who are one heart and mind with Allen Michael in bringing about the prophesied New Order for the Ages. Thanks to Bill Best for cover art and illustrations; and to Kathryn Hannaford, Joseph Antaree, Del Parry, Michael Parry, Tyson McCarthy, Thera Antaree, Sue Haack, Allen Beale, Dian Michael and Michael Bobier for their assistance in editing, proofreading and typesetting this wonderful message for humanity.

~ Bill Hannaford,
editor.

Contents:

Introduction
World Bill of Rights
Union of Labor
Capitalism a Detour - Socialism on the Main Highway
US-USSR Destiny Mission
World Wide Passive Resistance Movement
US Citizens of *Israel* - *Not* Americans
Money for People - Not Profits
There Is No Enemy
Crime a Natural Revolution Against Unnatural Conditions
The World Harvest
The One IDEA Above All Duality Concepts
Stop Clinging to Old Dogmas
Affirm the Truth
Cyborgetry Must Create Wars
Uni-Christ Consciousness
Path to Total Healing
Not Playing for Peanuts
Exposing "Secret Chamber"
World Detente
The Universe's Perfection
Changing Over to the Kingdom of God Organization
A Blessing to All Families of the Earth

And I saw another angel fly in the midst of heaven,
having the everlasting gospel to preach unto them that dwell
on earth,
and to every nation, and kindred, and tongue, and people.

- Revelation 14:6

Introduction

In this Immaculaceptor Galaxy, this world is known as Placentia - planet of plenty and rebirth. Now is the time for Placentia's citizens to awaken to the realization that civilized Life exists throughout the entire Universe. Space beings of the Galactic Command Space Complex are here, now, channeling a universal message of peace and goodwill to all the people of the planet through this prophesied *Everlasting Gospel*.

Know that the time has come to reunite with the eternal Universal Family to bring forth a New World Order. Through the wonderful World Master Plan given here, the people can unite to establish a golden New Age of real peace. The use of high galactic technology shall supply the people with unlimited free energy, bringing absolute freedom, security and abundance to everyone, and interstellar cultural union with the civilizations of other worlds.

Let the world people unite now under this *New Covenant-World Bill of Rights* to establish themselves as a New World Government: an international world wide communal democracy that is of, by and for the people. This declaration of Universal Rights fulfills and supersedes the US Constitution-Bill of Rights and the Constitutions of all nations.

The *New Covenant-World Bill of Rights* provides the vision and foundation of a new civil social order wherein all material resources and industries are held common by all the citizens of the world. This guarantees the provision that all things which are proper and perfect shall be added unto every person; and each will have absolute freedom, security and abundance on one high standard.

The US citizens were supposed to produce real liberty, justice, equality and true pursuits of happiness, but instead they have fallen under the negative effects of capitalism. Liberty, justice and equality shall now be made a fact of life thru a free economy of universal giving and receiving, getting rid of money altogether.

Know now that the Scriptures contain exact Universal Mind cybernetic channelings which prophesy this time of the end days leading to a great planetary rebirth: a reawakening into eternity and the regaining of a shared life with the Universal Family which lives throughout the planets, stars and celestial

realms of this Galaxy, and throughout the rest of the Universe as well.

Jeremiah 31:31-33 foretells of this *New Covenant* given to mankind: "Behold the days come, saith the Lord, that I will make a *new covenant* with the house of Israel, and with the house of Judah: Not according to the covenant that I made with their fathers, in the day that I took them by the hand, to bring them out of the land of Egypt; which my covenant they brake, although I was an husband unto them, saith the Lord; But this *shall be* the covenant that I will make with the house of *Israel*; After those days, saith the Lord, I will put my law in their inward parts, and write it in their hearts; and will be their God, and they shall be my people."

Thus the Universe has foretold the coming forth of this *New Covenant-World Bill of Rights* which brings into the real world humanity mission all of the world citizens of *Israel*, which means "is real" and refers to all those who finally bring in the Kingdom of God, or New Order for the Ages. Its wisdom and truth are self-evident:

The New Covenant-World Bill of Rights

Let each of us share all the world - the kingdom of God
and call one place of our choosing our own
and be free to come and go in the world
and stay at any dwelling place
accomodating travelers.

Let each of us give to the extent of our abilities
to the One World Company, and in return
all things shall be added unto us.

Let each of us be judged only by our conscience in God
and let no people judge their fellow beings,
but rather take judgement of their
own thought and action.

Let no person or group hold any authority over another
except that people be willingly led by wisdom
and true personality.

Let the government be of the people, where the people
are self-governed; by the people, where the people
enjoy perfect freedom; for the people, where the
people give themselves abundant living.

Let the government seat be only the storehouse
and inventory of the people's products.

Let all things be done unto edification, for God
is not the author of confusion.

Let the truth be known. In this Everlasting Gospel is the World Master Plan sent by the Uni-Godhead thru the person of Its New World Comforter, Allen Michael, to bring forth a One World Nation of Israel (that which IS REAL), to fulfill the people's destiny of a New Order for the Ages.

It's about time earthlings recognize that this planet and its people are of the Universe, and that finally the Universe they speak of as God, or Providence, is taking over; because, if It didn't, earthlings would go right off the deep end thru biological degeneration, which they are creating out of their wrong use of spiritual energies.

The Universe has given earthlings space in time to correct their long-standing errors against Its natural dynamics. But they haven't come out of their obvious errors, which are economic. Acts 4:32-35 tells how to correct them:

"And the multitude of them that believed were of one heart and of one soul: neither said any of them that ought of things which he possessed was his own; but they had all things common . . . Neither was there any among them that lacked: for as many as were possessors of lands or houses sold them, and brought the prices of the things that were sold. And laid them down at the apostles' feet: and distribution was made unto every man according as he had need."

Now, old orthodox science, coupled with runaway technology, which are both out of the hands of the people and their representatives, are leading them on to doomsday. This is not necessarily from nuclear missile disaster because, as people will find out, all nuclear weapons are ultimately controlled by ETI (Extra Territorial Intelligence) space beings of the Galactic Command Space Complex. The angels in the clouds spoken of in the Biblical scriptures are the UFO-ETI servants of the Uni-Godhead who are in charge of the delivery of this planet into its New Age. If doomsday were to come, it would occur as a result of the food, bodies, soil, air and water of this planet going on into worsening degeneration.

All ignorance must end now. So the Universe sends Its space beings of ETI, "angels of radiant light," to transform the old world order (powers that be) into our long-awaited heaven on earth - the eternal Kingdom of God.

To build the foundation upon which a New World shall be born, the Universe is calling all humanity to carry out certain necessary changes. Let the people unite to:

Adopt the New Covenant-World Bill of Rights as the one and only natural law governing all people.

Disarm the whole world.

Carry out a World Wide Buyers Strike that stops the old

world system of buying and selling and establishes the New World Order of total sharing.

Get Rid of Money (GROM) by creating "free cash flow money" to the end of eliminating the money system altogether. The New World economy of pure giving and receiving has no need of money at all.

End the judiciary-penal system as it presently functions. All persons who fall under compulsion to commit antisocial acts should be objectively helped, loved and lifted regardless of what they have done.

Thru a nonviolent World Wide Passive Resistance Movement, convert all the world's armies into a World Peace Corps. All soldiers become Universal Soldiers who are dedicated to keeping the peace and do not fight in wars.

Provide all people with their basic needs of food, clothing, shelter, care, recreation, transportation, communications and energies on one high standard.

UNION OF LABOR

Labor unions are part of the Uni-Godhead's plan to unite all humanity into the Kingdom of God, a heaven on earth, or state of true Christ Communalism that is being established over the world at this time. Both the labor unions and the system of capitalism which the workers strike against to get higher wages and better working and living conditions have reached their zenith. For labor unions to fulfill their destiny mission with the Spirit of Truth, they must unite now and take the great step that will end usury money, which is what capitalism is.

Capitalism is not an inspired, thought-out and engineered system. It has only evolved out of the secular ways of the people. It is only effects and has no cause in itself. In the greater sense there are no capitalists, there are only people bound to usury money.

The workers are bound to servitude in a ten percent interest time-lag and an economy of planned obsolescence. Why work at all if your labor is taking humanity backward instead of forward? Half of the world's population should be on vacation at a time, enjoying the things the workers produce. This will come about when the value of things is based not on the production of profits, but on the essentials of life, which the Universe and Its nature produce.

It is said in the *US Bicentennial Year Book* that Adam Smith was the father of capitalism. This is an illusion in which persons mentally subjugated to effects - which is what capitalism is - try to find support for their doings from men of renowned thought. Adam Smith's economic system didn't include usury money. It was inspired in him as the way for artisans and business people, consumers and producers, to get

things into gear and bring the world up to this place where a New Age could be launched.

The idea in democratic government, and now in detente, is that it is supposed to be used to make world government for those who toil by the sweat of their brow, and to get humanity up to the place where the Kingdom of God comes in all over the world. The workers haven't toiled by the sweat of their brow because the symbolic Eve sinned, but because they were not united into the Uni-Christ Idea: "the idea whose time has come now and cannot be stopped."

If money in the US had been used only as a true medium of exchange - which, according to the Constitution, it should have been - then there wouldn't be only capital wealth controlling all the people; but there would also be a free cash flow spiritual democracy that nourishes the workers, and they would not have need of money at interest from private bank loans or need of insurance as it is now. In other words, there should have been a way for the working class to have spiritual democracy - a government of, by and for the people. And there should have been another way to finance the people who needed joint stock capital for the building of large industries.

We workers buy things and pay for them out of salaries - and even pay sales tax, income tax and property tax - all because, as St. Matt. 21:42-44 tells us, the cornerstone for the right use of money was never laid when the US was founded. We'll go into this more later on. We go thru all these money trips in God's potential paradise of abundance for everyone. A strange phenomenon in a totally automated Universe, designed thru atoms (RNA-DNA-ESP-PSI) to give everyone absolute freedom, security and abundance.

Those people under capital wealth (capitalism) are in a punishment system where they are judging themselves for their sin and they don't even know what their sin is. They are told their sins are such things as adultery, stealing, lying, etc., but these aren't their major sins at all! Their major sin is that they buy and sell and wheel and deal for their own secular advantages. They don't get their daily bread (their needs) directly from the vine of life, but they play rather foolish money games with their material toys, apparently to get ahead; but with their usury money (money under interest-bearing notes and taxation without representation in the people's commerce) they are going further behind and not ahead into natural progress.

But now we shall change all this thru a World Wide Buyers Strike. It isn't enough that we are the entities of a fantastic Universe, which has everything we can imagine that's good for everyone, giving us all our needs. We must rise now and do our spiritual part in bringing in a *New Age*, which is set apart from this old dying world order.

Some people say, "Oh, we've worked hard for what we have, and we're proud of it and wouldn't give it up for anything." That's because something better has never been shown them. They have been told of a kingdom in heaven they would go to if they were good, but they've been told little about the Kingdom the Uni-Godhead establishes here, and by what means it is established, and by what people.

Many people think they are under evolution and on the main line of progress and some day, by and by, they will evolve into a better way of life. With their science of effects they hope they will be able to stop wars and criminal acts, conquer degenerative diseases and end poverty. They are under illusion. The Babylonian system they live by is itself the cause of their warring, crime, disease and poverty.

How then will they conquer these negative effects when their whole system of usury money is such an economic advantage to the thousands of doctors, lawyers, bondsmen, etc., who treat mainly the effects and do little about their causes? If they told the truth, then they couldn't get paid. So who wants to pioneer a better way of life anyway, when it's so easy to live in the illusions!

This would be ok, perhaps, if the grave was the end. But of course it isn't! We keep coming back until we learn to do it the right way, and then our earth trials and tribulations end. The right way is to hold all natural resources and industries of the world common. Let the whole world be set up as a great One World Family Commune!

This can all be done through just having fun. Most people have thought, at times, that there should be but one class of people, that we should all be equal in respect to having our needs met and giving according to our ability.

One class can be brought about without any hassling, simply by the common people of the world uniting together and carrying out a World Wide Buyers Strike. This would put everyone in the same boat.

All the superfluous businesses would close, yet no one would lose anything of value. Until those who are out of work were brought into creative schools of experiences, they could be on a paid vacation. At the time of our World Wide Buyers Strike, when it really gets into gear, we'll stop making payments. And all the new office buildings the workers have built would be returned to them to convert into communal housing condominiums, because they wouldn't be needed for business as usual any longer.

About eighty percent of the people are dabbling around with superfluous kinds of work and monkey business that produces nothing of real value, things that will not even be in a planned, spiritual way of life. Why are so many people running to and fro, going nowhere important? Even when they go vacationing, most of them wish they had stayed home because

everything out there is so commercial. Everyone's got their hand out for money, except in the socialist countries.

CAPITALISM A DETOUR - SOCIALISM ON THE MAIN HIGHWAY

The people under capitalism are not on the main line of evolution. They have been led onto a detour, as private banks took control of their money. Now, way over on a side road, they are coming to realize they are lost and can't get back to the main line of soul evolving without junking their old system.

Private bankers didn't personally create their money - lending to work hardships on people. It just evolved out of the people's secular ways. Now the people are after money. If money had only been a token to represent each person's amount of giving to the common good of all people, then this money changers' system of cyborg capitalism we live under would not have evolved to enslave us as it has. The private banking system evolved out of the secular ways of the people, just as nearly everything else has.

People don't get together on a collective basis to celebrate their revolutionary progress towards their seeking first the Kingdom of the Uni-Godhead so that all things could eventually be added unto them. The yearly celebrations they do have are only a mockery of the truth and the democratic spirit. The gentiles celebrate their commercial Christmas, which is a complete farce. The Americans celebrate, with fireworks on the 4th of July, their independence, which they never obtained. They won the War of Independence from England, so to speak, but lost its cause. They got the private banks of the old world anyway, because they didn't even know what they were fighting for. They got usury money instead of free cash flow to nourish a people's commerce.

So then, for a long time everyone has wanted their own fig tree in their own back yard and their own little hut on a square lot that always has bills to pay, with added interest and taxes of course! It would be much simpler to just make all things free. Think of all the personnel it takes to read meters and send out bills, and the hassle of paying them. All wasted time! People have lost faith in people! There's nothing wrong with people. There's only something sadly wrong with the kind of economic system they live under. Anyhow, we're going to end all the worldly systems now and build a One World Communal Democracy.

When the cost of living soars out of sight, taxes increase out of sight, and industries cut back and lay off workers. Then revolution comes because usury has thrown the economy out of balance. Too many people playing the numbers rackets and not enough people producing essential goods and services is an imbalance. Then at last the establishment uses police and

soldier power to try and halt the spiritual movement of the people. The establishment, those imbedded in authority, evidently think they are God; and above all, they think their government must keep functioning as the Imperial State or the American dream won't come about. They take much glory unto themselves and attach much importance to their two houses of representatives, which in truth is a house divided against itself and cannot stand. Why don't the elected representatives of the people's government agree on those things that are self-evident in the US Constitution-Bill of Rights, given by Nature's God? Instead of legislating the ways and means of free cash flow in the people's commerce, they legislate usury money deals, make laws to reinforce the things that are wrong, and penalize the people for being natural in an unnatural system. Who wants to go on buying and selling their daily bread for secular profit any longer! The time is at hand to end the old world ways and means, mark the slate clean and begin anew on a clean slate.

All these shenanigans of our old way of life must be changed, and the proper way to change them would be for the people to unite and wield the power of right-on words and actions that will make the government print free cash flow money and circulate it freely through the communal commerce of the people. Then the people will not be simply trying to get rich, but they will begin to have an abundance of all things that are produced in the proper way.

The system of capitalism is effects and it cannot afford to farm properly, run industries properly, conserve natural resources properly, etc. It is an automatic waste system that pollutes the air, water, soil and our bodies, and squanders our labor in superfluous things.

Who would suspect that, as a worker, you would be going to the bank to deposit money to borrow back again, eventually to go broke and then be repossessed? As a worker for wages, you can't pay interest on money, because it isn't in your pay. In your pay is only an allowance to keep you paying bills and grubbing.

Who would have suspected that in the buying and selling of their daily bread for secular profits, the people would end up with no real food, security or way of correcting error, short of junking the whole system and starting over again on a clean slate, as they should have been done at the many key points in history? The people didn't have to ride the gravy train right on down to this kind of an ending, where it's 'do or die'.

Who would suspect that, in going to the commercial market and buying cans, bottles and boxes of commercial food, people are giving themselves their degenerative diseases and mental diseases? And the doctors they go to only treat the effects but never tell them the truth about the real causes. Most of them just want to get paid in their kind of money, and they

couldn't get paid if they exposed the causes. Do they know the causes and are deliberately deceiving the people, or are they plain ignorant? The cans, boxes and bottles are not as good as nature's wrappers, and the garbage man has to haul them away to the dump, or to be recycled into more cans, bottles and boxes. And who wants to go on making cans, bottles and boxes and printing fancy labels? Isn't all of this a waste of the creative potentials of the people? In America they say: "Oh, we must do all these things to keep the people employed."

In socialism they are beginning to say: "What is labor if it's for a dead cause? Let's eliminate the useless repetitious things and change over to natural ways and means." The socialists have laid the foundation so they can make any changes they wish without hurting anyone; except, seemingly, their capitalistic competitors, and it won't really hurt them a bit.

For every degree that socialism advances, capitalism goes down a degree. Socialism can't advance without sharing, and sharing creates positive mental seeds in the planet's aura, which conflicts the cyborg beast of capitalism with convulsions and more contradictions. The socialists have taken and absorbed all the blows the beast can give. Since the beast can't destroy socialism in war, then it seeks to destroy it by nuclear weapons, but only succeeds in knocking itself out.

However, the way to balance the plank on a rock - with free enterprise on one end and socialism on the other, teeter-tottering back and forth in emotions - is for socialism to go on into a demonstration of true communism right away. Everyone wants true communism when they hear about it and come to know what it is.

It's like the Socialists can't have communism until the US citizens end cyborg capitalism. And the people who are yet under usury money can't have real democracy until they get rid of interest and taxes and live by the truth alone.

Those living under socialism have the greater advantage because their system is on the main highway of progress according to Uni-natural dynamics, and is evolving towards Christ Communism. They are not in debt to anyone, nor are their prices going up or their workers being laid off, and they have no appreciable taxes to pay. They are operating a collective workers' complex where all the people evolve together on the same high standards in which they can go onward into the New World Kingdom of God. They don't know it's the Kingdom of God that's coming up, nor do they know they are the church of the Uni-Godhead that rose out of the people; but it's obvious that the world destiny mission is put into their hands.

On the other hand, however, the poor people under capitalism - which isn't an economic system, but is simply effects of the people's secular pursuits of happiness, which

hasn't turned out to be the real pursuit of happiness at all that their Constitution given by "nature's god" envisioned for them - are going right off the deep end into a karmic cleansing revolution that would destroy the "powers that be" that bind them to usury. But why go that route, when I'm giving you a way to bring the US Israel into its destiny mission along with the Soviet Union and Red China Israel?

US AND USSR DESTINY MISSION

When the US was founded, it never crossed over into its "New Order for the Ages" (Novus Ordo Seclorum) as depicted on the pyramid side of the Great Seal of the US. Above the capstone it reads: "He prospers our undertaking" (Annuit Coeptis). Who is "He"? "He" is the Spirit of Truth. See St. John 14:16, 17.

The US pioneers that Abraham (Gen. 12:1-3) led to the North American Continent had a good 75 years here before the Continental Congress came.

They had settled 13 colonies and had little trouble with red people. In fact, they were integrating and exchanging ideas and goods and services with the Indians.

Benjamin Franklin had instituted colonial script, which the people exchanged.

They had at least one copy of the King James Scriptures and had read the verses in Acts 4:32-35 about Jesus' teachings of holding all things common. But the hang-ups or preconditioned responses they carried into the New World, from the old world they had come out of, were still prevalent in them.

Naturally, the International Bankers of those times, having risen out of persecutions, rose to control the money of Europe and were not about to let a new nation rise and inaugurate a new kind of money, because it would obviously ruin their kind of money that was lent as interest-bearing notes and thru which they could influence the levying of tax money, which they could also control.

We can say now that the US pioneers were meek as lambs, but they surely were not as wise as the old serpents of materialism.

Not until Prophet Marx came with the *Dialectical Gospel of Materialism* would Israel people have any real knowledge of what property, tools and money are.

The International Bankers sent their CIA of those times (the same CIA that exists now) to the North American Continent. Alexander Hamilton was their main spokesman.

The drafters of the Declaration of Independence were greatly outnumbered by the majority of mortal-minded intellectuals. Those who drafted the Declaration had to fight with words that were loud and clear to even get the Bill of

Rights into the Constitution, without which it would have had little meaning, nor would it have been different from any other nation's Constitution at the time.

After the Declaration of Independence had been accepted, noted editorialists all over the world praised it and believed that a new form of government had been declared that was idealistic and would influence good social changes over the whole world. The idealistic writers in Russia, where new ideas of freedom were growing, were especially aware of the freedoms of the people presented in the US Bill of Rights. Russia at that time was the best ally the US people had, as history also shows.

As time went on, the US became involved in foreign money deals with status quo governments that were not in the interests of the people of those nations, nor in keeping with the high idealism of the Declaration of Independence. As time went on, the idealists in other oppressive nations could see that the American government was just like the rest of the national governments, more interested in deals and profits than living up to the high ideals they had dedicated, which called for a new economy that printed its own money and would not fall subservient to the old world bankers, who came from Europe to America as a great eagle. "He cropped off the top of his young twigs, and carried it into a land of traffic; he set it in a city of merchants (New York City Stock Exchange)." The parable about the two eagles and a vine, as depicted in Eze. 17:1-6 and 7-10, is referring to the European Rothschild Bankers who had taken over the US money system and that of England. As we see, England built a great empire on usury money, which it has since lost. So it is with the US in these times. But even so, the Jewish Bankers (who became Zionism) and the CIA, which was organized as their scout troops to secure their international investments, got the world off on developing the Industrial Age.

Let us remember that there are two sides to all status quo deals. There is that of invested interests and that of the workers' interests. Had the common people understood and had they been organized on behalf of their own interests, then there could have been democratic bargaining between capital and labor. In Ezekiel, Chapter 18, he writes about sour grapes, God's promise of life to the just, a just son of a wicked father, etc. The thought he uses is in duality, the belief in the just and the unjust. But all along the unjust have been a relative product of the just, who didn't base justice on the ideal of a world to share with everyone. Both the invested interests (capital) and the workers' interests (labor) have been based on money and property. The value of this prophecy for these times is that it does give an account of why the US and England have been in bondage; and it shows how the time has come when they can easily get out of hock to

the old world bankers and out from under their controls. Gog (the CIA) only has power thru the people that will fight to keep their own private property and money. All the fighting can end now, because we are all going to inherit the planet together, rising mind over matter.

The main thing that was to come forth in the new US was a new money system that would break the power of the old world bankers who, by that time, had all Europe sort of in hock to them. The bankers financed both sides in wars, and therefore it seemed they were playing the nations against each other. This could only be done because the people had no world movement of their own. There were churches and temples everywhere, but no united people's movement in the idealism of the Uni-Christ Idea.

I'm not trying to show that the International Bankers were in the wrong, for nations should have legislated the terms under which International Bankers could operate in them. But the one thing the people in general wouldn't rise above was their secularism, which amounted to trying to cut their piece of pie out of the middle by setting up legal processes thru which they could own property, have their own savings account, borrow money when needed, etc. This is, of course, ridiculous because the people with the most money get their cut first and most people just get crumbs.

If money were ever to be used at all, it should have been used as a token that represented each person's amount of giving to the common good; and the price structure of goods and services should have been established so that, with the medium of exchange the people received, they could have purchased each day an equal amount of the full measure of the things they were producing. Every person should have been able to share traveling facilities and all the recreational things that have been built by the workers. Only the people under cyborg capitalism are yet bound to the old status quo. They are folding back against themselves and need a way to liberate themselves and still save face in the face of impending disaster.

You may say: "How could growing businesses and industries make the profits to expand with if money were used only as a medium of exchange and not to be taxed or lent by private banks at interest?" If you read the Constitution-Bill of Rights of the US Israel properly - which nature's God inspired through the men and women of the Adamen (Freemasonry) - then you will see that the government had two wings like a spread eagle, as depicted on the side of the American Great Seal that would be used during the American Gentile period. The New Age side of the US Great Seal is the side with the pyramid of the Adamen on it. The word Adamen comes from the true meaning of Adam, which means "atoms" or "atomic Universe." One branch of the US government was to be for the commerce of the smaller

businesses, craft workers, skilled laborers and artists, and the other was to be for the government's financing of large industries and the right use of natural resources. But this never happened in the US when it was founded, and St. Matt. 21:42 thru 44 tells us why.

The Godhead had brought forth the Jew or Hebrew bankers of Europe to set up a joint stock company, through which big industries in the growing US economy and over the world could have large sums of capital wealth (this was not to be capitalism) to finance the big industries. They were to pay a service fee to maintain the joint stock company. But the workers and smaller businesses were to have a free cash flow commerce. This never happened in the US because the people were on secular trips, and they are still trying to cut their piece of pie out of the center.

What is now the privately owned Federal Reserve System in the US is the joint stock company, and the International CIA Ring is their clandestine activities organization and is the seat of "Gog" (demagoguery). This is spoken of in Ezekiel, Chapters 38 and 39. The CIA is organized to protect the domestic and foreign investments of the World Bankers. That is, the Old World Bankers, because now the World Bank of Israel - set up by the USSR tribe of Judah - has the real money system going that finances new industries for the working people and supports the world people's Christ Communist Revolution.

So now the Old World Bankers will have to throw in the towel, because they cannot compete with free labor, or money that does not bear interest, and is not under taxation. But the Old World Bankers can't throw in the towel, because they are under past karma, as nearly everyone else is. And the vision of what the *New Order For the Ages* is, is not out in the open yet so that all people can see what it is and how to obtain it.

In knowing past history however, we see that Christ Communism in the Soviet Union did receive much financing and material goods from the US to rebuild with after their karmic cleansing revolution of 1919 thru 1921, and they received financial and military support to help defeat Gog's army in the World War Two Armageddon. And at present their grain deals are going through, as well as other trade agreements with the US. This shows that all things are working together for good unto those who love the Uni, its life and nature, and are called according to Its wonderful purposes.

In St. Matt. 21:42-44 it was the US Tribe of Joseph the Kingdom of God mission was taken from because they never laid the cornerstone - the right foundation for the right use of money. Naturally, money was never to become a commodity that was taxed and loaned at interest rates, but the US pilgrims obviously didn't know what money was and allowed it to become

usury through private banking.

The USSR Israel, which is the Tribe of Judah, finally laid the cornerstone in Russia. This was the return of the World Nation of Israel, and its principal aims were to end private property and usury money. This they did, by forming a workers' socialistic democracy.

We can know that all the high men and women of the past keep reincarnating into every decisive age and keep doing their spiritual things until, at last, the whole world is in the New World Order; which will be so different from the past preliminary period we are emerging from, that very few people would recognize its tenets or have its vision at this time. But now it's either lay the US cornerstone so that we can come up to par with our sister republic, the USSR, or else this nation must go through its karmic cleansing revolution, which fulfills the prophecy in Eze. 37:15-17 about the joining together of two sticks to be one in the hand of the Spirit of Truth. The US citizens cannot be on a par with the USSR Tribe of Judah unless they end the ownership of private property and usury money as the Soviets have done.

At this time, the high people of the old religions, and even of the Masonic Order and World Zionism, are passing on into the higher ideals of building a new world Communal Democracy, but the churches and temples of religions still have young souls in them who are yet under labels and are not up front leading the world people of Israel into a Heaven on Earth, which is of the building of true Christ Communism all over the world.

St. Matthew 21:42-44 is telling that the US founders never got the cornerstone laid for the right kind of legislation of money when the US was founded. Present at that time were people of the US Tribe of Joseph that Abraham had gathered out of nations and brought unto this land, carrying the "Ark of the Covenant," whose colors were red, white and blue: red for the blood shed in the Christ Reformation, white for the Spirit of Truth, and the blue for the far reaches of *destiny*.

The main founders of the US Adamen were men like Thomas Jefferson, George Washington, Thomas Paine and John Adams, all members of Freemasonry, who brought forth the New Age side of the Great Seal of the United States of Israel on which the pyramid sits with the capstone above it, not mounted on the pyramid yet. This is our task now - to put the all-seeing eye capstone on the pyramid so that the US begins its destiny mission. Above the capstone with the all-seeing eye of the Spirit of Truth, it says: *Annuit Coeptis*, which means "He prospers our undertaking," and below the pyramid is inscribed *Novus Ordo Seclorum*, which means "New Order For The Ages." We have waited this long to lay the proper foundation in the US for its destiny mission, which unites us with our sister republic, the USSR Tribe of Judah.

Let me say this and perhaps it will sharpen your wits: Satanic power is the prod to progress and the latch of retrogression. The people in their erring ways have negated their space aura, and filled it full of enough negated atoms (satanic power) to now force them all the rest of the way into the Kingdom of God organization growing on our planet.

What the orthodox religions have been calling Satan is satanic power; and every by-product the people create out of their usury, which causes them to do things the wrong way, is automatically recycled by the Universe against the people, giving them back the anguish of the wrong they have done. This is the time the world people break with nationalism and stop worrying about an enemy or that their nation is in danger. When we finish our 1290 days of World Wide Passive Resistance Movement there will be no national powers left. We are ridding the world of nationalism. A One World Government comes that is totally in the activities of the people fulfilling life unto one another.

The Uni-Godhead has set aside the seven year tribulation for the world people of Israel to do great things (Daniell12:1-13). Add the 1290 plus 1335 days spoken of in this prophecy together and you get about a seven-year period. In the first 1290 days we carry out a World Wide Buyers Strike. At this time, we keep the necessary services and supplies going, so that everything we need is available, but everything that is superfluous to our New Age we let fall out of the picture. No one really 'loses their job'. All jobs as we know them now will become creative experiences, and there will be no dirty jobs or hard jobs left to do.

WORLD WIDE PASSIVE RESISTANCE MOVEMENT

The altruistic idea of a World Wide Passive Resistance Movement - WWPRM - is to bring about the necessary changes through nonviolence. Violence is only of people who are yet under fear of their own police military-legal processes. Passive resistance isn't by any means new. Every real visionary and revolutionary through the ages has conceived in the unity of many people to bring about the end of the status quo world; but as we know, the great world people's movement of the Israelites had been set aside for a particular time.

No real WWPRM could come until its time had come, and its time has come. Either many people will die by their own foolish devices in the coming Last War for the World - the last part of the battle of Armageddon and world tribulation - or for a real change they will act in righteousness in their own behalf and in behalf of their world humanity and end this old dying world order through what will amount to having the best time they ever had. I mean just that. There's no blood, sweat and tears in the kind of nonviolent revolution I am

organizing under the Constitution-Bill of Rights of the US given by nature's God, in which the US citizens already have their rights and their true laws. For the most part, the millions of pages of laws they have written since do not uphold the Constitution at all; but, as I have said, are only accessories of the buying and selling world. In the laying of the US cornerstone now, so the real US can begin, we must disrupt business-as-usual. The kind of disruption we bring about ends completely the Gentiles' business as usual world, and begins the kind of government of, by and for the people that we would have had if the proper cornerstone had been laid when the US was founded. Surely not you or the legal Americans are going to argue with the cybernetics the Uni-Godhead gave, long before the Father God led Abraham and his followers to this North American continent. The Uni-Godhead had already appointed the men of the Adamen to lay the proper foundation - which, as we see, never got laid.

Grasp the value of prophecy. Gen. 12:1-3 and St. Matt. 21:42-44 puts the US citizens on the spot. The US tribe of Joseph is to become a "blessing to all the families of the earth." The US Israel cannot become a blessing to anyone - not even themselves - until they bring cyborg capitalism under the dominion of the righteous world people's government, and this means the end of capitalism, which is only effects and isn't an economic system in the first place.

The Last War for the World isn't really promoted by any sinister force. It's a happening in which the cyborg dragon falls. Just like the tide ebbs in and out, so it is with the building of karma that fires a war; and wrong economics is one of the main causes. The tide flows with the Universe, and when people are under negative karma they flow against their higher nature; but their higher nature wins the battle and makes them right for all humanity. As I keep repeating, the Last War for the World doesn't need to come to the world people, for the world people have it within their power to go the extra mile by advancing a real World Wide Passive Resistance Movement and World Wide Buyers' Strike.

So then what will be the outcome of the Last War for the World, that begins in the Middle East and spreads across the US mainland because US troops are involved again? People are just unrealistic dreamers when they go on further into the armament race and support the military establishment at all at this time.

The main thing I want to point out here is why the Last War for the World will come in the Middle East. Look at the surface of the planet and you will see that the wars since 1914 have come in strategic places over the planet where the people have been held under the old order of imperialism. All of this deals first with ETI - the space aura into which people have been collectively recording their experiences. The

people of all nations, except those led by Christ Communism, have been repeatedly sowing negative karma for themselves, simply because they buy and sell and wheel and deal in materiality for secular profits. This in itself is the cause of soaring prices and workers' layoffs. The kind of direct action we must take now would involve the soldiers, workers in general, students and church & temple congregations, who would not go on doing their part as they are doing it now unless the circumstances and situations under which they work were in harmony with the *Uni-Christ Reformation*. Can the soldiers of the world unite and lay down the conditions under which they would go to war? They surely can! What's to stop the soldiers of the nations from forming a union? They would obey the "powers that be" as far as the draft call is concerned, but they would all have an agreement that they would not fight - period!

The Soviets and the Red Chinese would really go for such Universal action among the soldiers of the world, because they do not need wars to accomplish their goals. They need only defense, mainly from the warlords who keep using war as a means of keeping capitalism going. Most of all, the US tribe of Joseph does not need capitalism or its wars. There is that illusion that we must be strong militarily just in case an aggressor nation should attack us. But look at the past record and you will see that no nation could or would involve the US mainland unless the US went into civil war, and then the Soviets and/or Chinese would come to the aid of US revolutionaries as they did in Korea and Vietnam with the democratic people of those nations.

The break between the Soviets and the Red Chinese will be healed, because of the way coming events will take place. Capitalism is in a position where its superfluous economy can never recover, and neither can it win a war against the Soviets, even with the help of Red China, should they conspire in such a futile deal. Only the Uni-Godhead that commands ETSI - Extra Territorial Space Intelligence - commands all, and It is in the process of bringing in Its kingdom here, and the wars are only eruptions of bad karma.

Actually, the church and temple leaders should have been the greatest influence with the world people in the cause of right-use-ness as applied to all material things. But as we see, the real church of God rose out of the people as the Christ Communist movement. The Uni-Godhead has brought forth Its church in spite of all status quo institutions, and has left them in shame to see their blundering.

The Uni-Godhead is as cool as a cucumber about the whole affair. It would apologize if It could, but It cannot, without remaking Its natural laws. The Last War for the World comes at a time when our iniquities have to end. It isn't to necessarily force the people into the Kingdom of God. It is

simply the result of the mental seeds earth people go on sowing. Our far out World Wide Buyers' Strike will prevent the last part of Armageddon from happening and bring in the Kingdom of God in a fun way.

The only persons who may get hurt during our World Wide Passive Resistance Movement will be those who come up against people who take orders from some group that may try to prevent the organizing of the world people for a World Wide Passive Resistance Movement and a World Wide Buyers' Strike. In no way will we resist overt forces who try to get us to resist their paid mercenaries; for in this way we could not succeed, and would be divided and cast into civil war with ourselves.

As Christ Revolutionaries we must be wiser than those old material serpents who are mentally subjugated to the cyborg and automatically act as robots. They secretly plan what they would call the defense of America against communism and they would welcome an uprising of the people that would give them the opportunity to employ military power to put the US revolutionaries down and reunite America to defend the so-called free world - which is only free if you have plenty of money and, even for those who do, the freedom that is bought is only superficial. There is no way to defend the free world, because it is falling due to its own economic ways, which are not of liberty, justice and equality. As we see in Korea and Vietnam, the materialistic serpents of capitalism secretly planned their military maneuvers there; which couldn't succeed and won't succeed now in the US or in the Middle East. They are only the *reaction* that forces the people into Christ Communism.

The old world establishment does nothing about the causes of negative effects. The old world establishment doesn't aim to end crime, because then the judges, lawyers, bondsmen, etc., wouldn't have jobs; and it's the same way with war, disease, and poverty. All these negative effects are caused by the system itself. The system is a paradox. It is likened to the Phoenix bird that burnt itself to ashes and then rose out of its ashes. What a way to go! But this is the way the American Gentiles are leading the US citizens now. It is very difficult for the US citizens of Israel to read between the lines as long as all the secret maneuvers go on in high places that the people have no information about.

But this Master Plan of the World Wide Passive Resistance Movement and World Wide Buyers' Strike that I'm outlining for the US Tribe of Joseph will completely spoil all the secret plans of the old establishment. We'll take the power out of their hands and put it into the hands of the democratic people, who are no longer operating within the status quo but have taken a course that goes right straight to the real objectives that are to be accomplished. The profiteers worry about holding onto their huge facilities of private property

and capital wealth. They do not know that the Uni-Godhead owns all property and has the power to call it all in to be held in common by all people. This does not mean private dwellings. According to the New Covenant-World Bill of Rights, each person can call one place of their choosing their own where they will live. Those people who do not have suitable living quarters now will soon have them, as we inherit all the superfluous office buildings the workers have built and convert them into communal complexes for the people to live in.

We will organize the workers to strike against the industries we are ending. We will not need picket lines any longer while we're striking. We will be busy raising vegetables, grains, beans, fruit, cleaning up our cities and doing many useful things. We'll make everything free to ourselves.

We'll organize one community after another, so that people can bridge the gap between the old dying world and our world being born.

We'll volunteer our energies towards keeping the necessary services and supplies going, and we'll live like revolutionaries during the 1290 days of Michael's stand with the Holy People (the Cosmopolitan World People). In 1290 days we will completely end the old world order and convert the entire world social environment into creative schools of experience through which all things are built and all services are rendered freely to everyone.

The Soviets and Red Chinese have, practically speaking, done this already. There is a great World Army of Israel already, and more people are rising in every Gentile nation every day who will defend their rights to world progress.

The Gentiles who keep Gog's Army going have shown their colors in World War II Armageddon, the Korean War and the Vietnam daily sacrifices of our sons at the altars of old national superstitions and traditions. The dialectical contradictions of capitalism that prophet Marx speaks of have come about. Many people are now turning their face away from Gog (demagoguery) and the Gentiles are plenty worried. (The Gentiles are those who fight for national political groups that yet support the status quo and usury money.)

We do not mean that Marxist-Leninist communism is the last word in communism. The bid to build the true communist or communalist (same thing) world is still wide open for anyone to take up its challenge. Everyone can take up this cross in Christ Spirit as their challenge - so they don't get double-crossed anymore! Ha!

We do, however, state that the blind leading the blind are never going to return the planet to capitalistic effects. So therefore, the people under the illusions of private property and usury money (money lent at interest rates and under

taxation, not representative of the people's free commerce) should take the next step ahead that goes beyond socialism and fulfills the US destiny mission in Christ communal ways as described in Acts 4:32-35.

It is a simple thing to convert all US industries and institutions into communal free enterprise. The labor unions need only to unite and tell the owners and managers of industries and institutions that they want to hold all things common with them. The owners and managers will agree, because they can see that the workers could call a universal strike and shut down all nonessential industries and only keep food, clothing, shelter, care, recreation, transportation, communications and utilities in operation.

The workers would not lose pay because they would end all bills and cancel all past debts by establishing, in this late hour, the real government of, by and for the people. Then liberty, justice and equality would become common sense to the people. As these words are used now, they just exist on a piece of paper hanging on the wall, and no one benefits from their real meaning.

The first and most important part of our World Wide Passive Resistance Movement is done through freedom of speech and of the press, or news media, and freedom of assembly. Our revolution is a "word revolution." Can anyone stop the freedom of speech and of the press that the Uni-Godhead has given us in our Constitution-Bill of Rights? Can anyone stop freedom of assembly? In fact, can anyone stop freedom of spirituality or freedom in the news media? If they can, then let them try it, and they'll be the laughing stock of the world people. The ACLU would jump down their throats. The ACLU has been looking for a good case of civil rights to sink their teeth into. The Godhead has laid the groundwork in bringing forth its democratic agencies. The Godhead has left no part of what it can do for us undone. All is ready for a big party on this Placentia planet.

The Americans do not give us our rights. The Americans do not defend our rights. The Americans probably don't even know what the US Constitution-Bill of Rights proclaims and why. We are not Americans. We are not hung up on a piece of real estate called America. We are the US citizens of Israel - that which "Is Real." And we have a rendezvous with destiny and it has a rendezvous with us.

US CITIZENS OF ISRAEL - NOT "AMERICANS"

Our nation is the United States of the World, united under the New World Government of Israel. The Soviets were the first to bring forth the World Nation of *Israel*, then Red China, then little Cuba. And soon the whole world will be snug as a bug in a rug under real Christ Communism, and then we're

really going to have fun sharing the whole world together. On second thought, snug as a bug in a rug isn't quite the right saying. With vacuum cleaners and that sort of thing, a bug isn't really snug in a rug. But anyway, we'll have found our place in our New World home that will be free of all the man-made regalia that only treats negative effects and does nothing about the causes.

Notice that I speak of the United States of Israel as two people. This follows the Scriptures, Hegelianism, Marxism and Leninism. In the US there are the citizens of the United States, with humanistic world ideals; and there are the Americans, who are antithesis and cannot act as citizens of the United States of the World until they enter into the destiny mission of the US Israel - "that which is real."

The antithesis, what we call imperialism or nationalism, is the part of the people who are clinging to the old world order simply because they do not have the vision of the New World Order, and their religions are not of one mind to demonstrate to people now, in their ways of living, how the Kingdom of God works.

Would they have the faith in the Uni-Christ Idea to go and register all their property under the charter of the Universal Industrial Church of the New World Comforter? Would they have the wit to all go and register for SSI (Social Security and state aid)? They have the right to apply, and the US government, through its people's democratic offices, cannot refuse them social aid if they declare the truth.

The truth about these things goes like this: First, the people of the Uni-Godhead's high and noble causes are provided for in the US Constitution. They are of the destiny mission of the US and they are the only people who can save the US from going through its karmic cleansing revolution to separate the chaff from the wheat so that the US can come forth to do its real mission.

Of this, the US citizens must not think that the coming of the Kingdom of God is in any way dependent on them. The people who do spiritual things are the first to benefit from them. The whole world benefits when people are made independent of state controls, because the means of producing the things they need are in their hands. The Americans can say that, in their free world and in their democratic ways, the people of the US Isreal have the means of production in their hands, and that the private banks, insurance companies, the government, etc., are only aids to the people.

They are blind as bats! All the money that goes for interest on loans, and much of the tax and insurance money, only creates more of a hierarchy - a special privileged class that, in their ignorance, lords it over the people.

They control the means of production and the propaganda media, and their judiciary, penal and military system sits

there as a high monolithic giant that causes the people to fear and to subconsciously see which side their bread is buttered on. In other words, the judiciary-penal-military regalia is just a big business and does not serve the Isreal people of the world; who, for the first time, are going to show the kind of spiritual power - the truth in action - that stops all superfluous dealing.

Take a second look - which side *is* your daily bread buttered on? It can be buttered on either side. It does not make any difference which side a slice of bread is buttered on, it's still the same bread. But it does make a difference when they try to tell you that one side is good and the other side is evil.

Socialism is a thesis, and True Communism is of the synthesis. The Soviets are a world force because they chose, out of necessity, to revolutionize a country in its means of producing goods and services. There is only one way that logic and reasoning could choose to revolutionize a nation and a people, and it is to get the means of producing goods and services out of the hands of people who only play with the material toys and make laws to their advantage, keeping their insidious penal and military system around to cause the people to see who feeds them. The people think they cannot eat, have a home, etc., unless they work for capitalism. They do not know that the government of the Uni-Godhead is rising in the people and has already infiltrated into the government of the US.

It would seem that those progressive people in the US government cannot make policy for a revolutionary people unless the revolutionary people know what signals, so to speak, they are going to use. A football team has plays. They call signals and the appointed one gives a signal to throw a pass, make an end run or charge through the line; and each player knows his part. But our kind of World Wide Passive Resistance Movement is not like a football game, and we do not preplan signals as to what we should and should not do. In a game it matters not whether you win or lose, but how you played the game. Of course the games under usury have money involved in them, so this makes the players play to win. They don't really win anything. They just get a more inflated ego that they are somehow better than the other team.

Also, for a people to say that others cannot eat, have housing, clothing and utilities, etc., unless they work for capitalism and play the money game, is not US Israel at all. And for people of heart to form kinds of charities that compensate for capitalistic blundering is not where it's at either.

The progressive people in government cannot come right out and tell the people they can get welfare, SSI, etc., and that they should begin to unite and use the money collectively,

thus demonstrating the good that real free-cash-flow US Israel money can do. The progressive people in government are afraid that if they come right out in the open - and mean what they say and say what they mean - and win supporters of the New Age, then the old status quo people imbedded in private property and money will come down on them.

They should have faith and see what happened in the WWII Armageddon, in the time of great need of the US citizens for unity of purpose. I mean, if it hadn't been for the coming in of the Roosevelt Administration as Armageddon approached, the US citizens would have been plunged into the war on the side of Japan, Italy and Germany. This is the way the International CIA Ring, which is the seat of Gog (demagoguery), had planned the war to defeat Christ Communism. The Scriptures in Ezekiel, chapters 38 and 39, told of the whole event. They also tell of the karmic cleansing coming up in the Middle East and spreading to the US Israel.

The thing that has happened is that they made money the thing in itself that they are after. And then they created a penal system to arrest what they call criminals. And then along with this, they created a military force - of all things! - to conquer the enemy. But in all the rather silly games mortals play, they only end up putting themselves in captivity; and then when righteous people try to liberate them, they fight back. It has been this way all through history, but it is not going to be this way any longer.

The Roosevelt Administration, made up of men and women of the Adamen, was moved into place in the US by ETI. ETI is in space atoms, and they are programmed by the Uni. Whoever negates the atomic energies or creative cosmic life force imparted to them is going to be led automatically right back through the folly and foolish things they did in the Uni-Godhead's Universe. The Uni is not punishing them! How can they learn right procedure if they don't suffer their errors?

What is this thing about usury money I keep harping about? This is what is revealed in St. Matt. 21:42-44, and I tell you what the Uni-Godhead tells me. It refers to the US tribe of Joseph that did not lay the cornerstone for the right use of money when they founded America in 1776. The *US Israel* didn't cross over into the beginning of its New Order For The Ages - *Novus Ordo Seclorum* - as prophesied on the New Age side of the Great Seal of the US Israel. When the US was founded, the majority ruled; and the majority, as we see all through history, took what seemed to them the logical path. But the truth is they had no real understanding of what money was or how it should be used. As long as money was to be the lifeline of life, liberty and the pursuits of happiness, then money, of all things, had to be free from all attachments. Actually private banks are really just pawnbrokers that sell money; and we have other kinds of pawnbrokers that sell your blood when

donated to blood banks; and the business area of every city has the ordinary pawnbrokers that lend money on expensive appliances. When they are broke and need money, people pawn things to get a little necessary cash. They usually cannot redeem their merchandise, so the pawnbroker sells it at a good profit. These are the ways of capitalism, the effects of the people's lethargy.

The people pray that their mental anguish will go away. But if it were taken away - that is, if their negative karma were taken away - then there would be no satanic or reactive energies by which they could be made to suffer the cause of righteousness to the degree necessary to bring about genuine mental peace and serenity. All opposites are relative to each other and will synthesize together for the people who come out of this old dying world order in mind. Why anyone would want to go on preserving the status quo world is beyond conscious reason. It is plainly ridiculous to wish to keep something around that is destructive. Look close into your daily merry-go-round ride, and you'll see you are harnessed to a treadmill to get your daily bread. Your laws, police and armies are all controlled to keep you on the treadmill so the owners of the mills can pay their bills and pay wages. The cause of all this is just what Uni-Godhead said: "The people who said they believed in God went their own secular ways and left their kingdom to other people." Now the preachers and politicians, most of whom have no practical experience at all in real essential work, are trying to tell the people what to do.

Now the US has a peanut farmer president who has experienced natural creativity and yet, at the same time, has been hassled with interest money and taxes. Maybe he will have some natural ideas.

Mental subjugation in materialism and its paranoid fears are a way of life for people who live through buying and selling. It works on a diminishing scale of returns, in which those who are making money off of usury live high on the hog and don't do essential work, while the common people are trying to keep their bills paid and homes, schools, etc., together. They all have the fear of failing in business, losing their job, home, car, etc. All these conditioned fears pile up and finally divert them off to wars. They always believe they are fighting to end repression and to have a better way of life. But obviously they're not. They are simply preserving the heavy hand of the old world establishment, which is held over them. The people of the old world establishment are not aware of the foolish things they do for national defense, nor are they purposely deceiving the people. They are just ignorant of causes and are purely pursuing the world of negative effects. War, crime, disease and poverty are only negative effects of people's wrong causes and will automatically go away when the people collectively come into

Uni-first causes.

The idea of defending America or going to war to save the American way of life is pure hogwash and has no kin with the US citizens of Israel. The American way of life is capitalism, and capitalism is effects. It has no other cause than to return to oblivion, from whence it came. This cyborg beast never should have risen in the US; and it wouldn't have, if the founding fathers had laid the cornerstone properly. Instead, they let the old world bankers come into the United States and gain control of the money. So, since the US did not lay the right foundation (the right use of money) for it, the World Nation of Israel had to be brought forth later on in Russia. In the WWII Armageddon, and again in Korea and Vietnam, it was demonstrated that a people's army could hold off the hordes of people mentally subjugated by capitalism. Now isn't it rather funny that a majority of the people in the US disapproved of the Korean and Vietnam wars and clamored to bring the GI's home so peace could come and the killing would end? But they had no real democratic power to employ towards that end. Prophet Daniel called these wars the "daily sacrifice" (Dan. 12:11).

US citizens didn't follow through to eradicate the cause and prevent the CIA Ring from planning these interventions in the first place, which would involve US soldiers and civilians in foreign wars. These wars were not for anything that was in the spiritual interest of the US citizens, but purely to continue the old dying world order. Since WWII, science and technology have built more horrible weapons, and they are in the hands of the cyborg puppets. It's a good thing that the Soviets have 'the face of a man' and ETI space beings have ultimate control over the nuclear weapons, or else all flesh would be lost.

Cyborg capitalism is the direct cause of war, crime, disease and poverty. These negative effects are not in our nature any longer, because the Uni-Godhead is giving us the new heart and mind through Its high PSI Synthesis energies being poured out on all flesh at this time. Through our suffering the cause of righteousness, It has written Its law in our inward parts so that now some of us are truly Its people of Israel. We are beginning to know, and know that we know! This is fantastic! The Universe, with Its omnipresent, all-knowing Uni-Mind, has become our God and we have become Its people (Jeremiah 31:31-34).

MONEY FOR PEOPLE - NOT PROFITS

The government of, by and for the people - ha! - has a print mint, so why don't they just print all the money they need and spend it? It's really funny that they don't! But we shall learn why they don't.

The Republicans, of solar plexus, are on one circuit of mind force and have greater control in government and of the use put to money, because they have been more of the old American tradition, private property, the military and the banking set. Democrats are more of the working people; but, because the Socialist Revolution of the workers took place in Russia, communism became taboo in America. Anyway, Democrats are left-wingers, and those left of center, by their Eros nature, are moving towards Socialism. But now the time of Uni-Communism is next on the Universal time track. So, you'll see a real radical left wing movement rise in the US that will end the squandering of billions in useless wars and begin the spending of billions for the real needs of the people - to the end of getting rid of money altogether.

This begins to take place during the first part of the 1290 day period. Then, as the world people are united by UFO's into the EG's World Master Plan, it takes precedence over all nations and will end all national governments.

Of course, if the US progressives had gone too far earlier, they would have been labeled communists and suspected of usurping the old American government. So, even if they had known the truth sooner - as to why the people's government doesn't just print free cash flow money and spend it directly in a people's free exchange or commerce - they still wouldn't have been able to tell the people, for fear of being booted out.

Most of the people who are elected into government positions are persons who are educated by the system. Which is to say, they have been stuffed with dogma and educated away from common sense and natural imagination. But the Everlasting Gospel will turn them on to what's really happening now. Congressman John McFall raised the issue about the government closing Sharp Military Base in the San Joaquin Valley of California, where many technicians are employed to repair electric equipment, etc. "Their labor brings lots of money into this area," he said, "and with an already sagging economy, the loss of revenue here would only add to the slump." This same sort of thing is prevalent all over the US, especially in many Eastern Cities.

A similar economic slump was present before the Korean War and, as it turned out, the economy wasn't healed by the war. It only grew worse. Then the people who fight communism thought they would make it in Vietnam, and we see the results of that. Now the economy is worse than ever. So, naturally, with the old kind of American Nationalist consciousness, we the people have no other recourse than to come forth openly and reshape the US into its world destiny mission.

The situation of US people is such that 90 percent of the people are ready for changes, but don't know how to bring them about. The 10 percent who have the power know they have lost

the people. So they have to create the kind of circumstances that will cause the indignation of the people to rise to a violent pitch. Then at the right time they can try to sell them on the idea that everything will turn out fine if they can just win the world back from the Communist dictatorship. But this doesn't work. The US tribe of Joseph is destined to go all the way from here to there into true Uni-Christ Communism.

Right now only about ten percent of the US people are antithesis, or of the thanatos character, and 90 percent of them are potentially of the New Age thesis, or Eros character; but progressive leaders must speak Uni-linguistics in order to spark the real democratic force in the US Israel into the real kind of civil disobedience and nonviolent passive resistance that I have been assigned by the Uni-Godhead to give to the world people of Israel.

If the US government had the guts that Abraham Lincoln and his close associates in government had and went ahead to print money and spend it where needed, directly for the people's needs, then this in itself would end capitalism and the whole nation would prosper as it should have from its beginning. Abe Lincoln, when he needed money to equip the Union Army, printed up "free cash flow" money to keep the nation together as the Uni-Godhead directed him to do.

Capitalism cannot exist when the people go forward. When free money is circulated thru the people's commerce, then everyone will be gainfully employed in essential services, and there will be no superfluous money games. At this time, the work that about eighty percent of the US citizens are doing is useless. They are squandering natural resources, running around in cars going nowhere important, further polluting the air, and so on and on. What for? What good is work if it isn't building our Heaven on Earth? People are working to have a job and having a job to work, and both of these aren't what the Uni-Godhead has intended. The period of working by the sweat of our brow is over. Now comes the time of real relaxation for everyone, and the redeployment of all people into essential first cause things. Naturally, the Universe - according to Its RNA-DNA nature facilities and its ESP-PSI energy or spirit life - never invented work or expected people to 'work'.

I express my creativity all thru the day. From the time I get up, until I go to bed, I'm channeling in first cause love services with the other members of the One World Family Commune. We can't get tired, because we are relaxed and on the hot line of PSI energies, which is perpetual, timeless, weightless, etc. We can't get sick, because we know that when we are not feeling well, we're only in the process of getting well. Our body is cleansing. We have a creative life, and we eat, sex and relax properly, doing all things according to common horse sense!

To us food must be natural, and if it isn't directly from the vine of life (nature's gardens) then it's dead and we don't partake of it, because we don't want to degenerate, but to rejuvenate. As I said, we know that when we get sick, we're already in the process of getting well. So what's the use of pretending you're sick, when you're only cleansing from impurities in the air, water and soil that you've taken into your body.

We can't go broke, because we have no property or money of our own. The Uni-Godhead knows what things we need to fulfill Its will and adds them unto us as we can properly place them. Would the Universe call us into Its services and then expect us to work under capitalism, to earn the money to buy the right to build Its kingdom here? Hardly! This would be quite impossible.

We came out of this old dying world order in mind, because we were shown in visions and told in our heads that the Kingdom was not of this world. It is of the world of Spirit, or mind energies of the Universe, to be applied on the planet. We are on the Hot Line that runs on thru the labyrinth. Do as we do, then you'll be born again of the Uni-Godhead's PSI energies and begin making the kind of changes everyone will have to go thru in the 1290 day period (Dan. 12:1-13).

Some people, who don't understand, tell us we live on welfare and social security and are just playing games with people's heads. And that the taxpayers and the government are footing the bill!

We tell them the truth, that there is no government except the government of the Universe, and it pays for all things. In fact, it even runs the US welfare and social security departments. We are the people of the government in question. So then, we are helping ourselves to that which is ours, and are responsible to our conscience in God to be successful in the mission given to us. Us is all of us.

The grumbling taxpayers are only paying for their own inability to know the omnipresent Godhead, sounding in the center of atoms all about us. They can go on swinging around on the yin and yang poles of the atoms, until they get flung out into the abyss again, or they could have a big change of heart and soul and begin to bring about the complete sharing of all things. Then all their make-believe problems will end and they will be given some problems that are a real joy to tackle, which bring real pursuits of happiness.

Here's a riddle, or paradox, it doesn't matter which: how come it takes a war to cause the privately owned Federal Reserve System, which nourishes capitalistic effects for their advantages, to spend billions like they were spending pennies? And why do the people have to support a useless military regalia, which serves no purpose in these times?

You see, it takes a 'reason' to create a war. Now, instead

of the reason being the illusions of political gain and security thru accumulating capital, why can't the reason be absolute freedom, security and abundance for everyone - minus the war, crime, disease and poverty?

The riddle or paradox is simply in what people believe God to be and what they have written about God's future life for them. That which the people have had has only been the evolving life, manifesting for them according to their own imagining. This whole 2,000 year period has just been a preliminary period to get things set up for the Kingdom of God that comes in to change the whole world.

For example, the Uni-Godhead gave a *Constitution-Bill of Rights* to the US tribe of Joseph bigger than they themselves. It has made them what they are! It has shaped their destiny! Some groups, who think God favors them alone, say: "O, if we could only get around the US Constitution-Bill of Rights, then we could bend the US people to our will." The US citizens of Israel have never really fought for their Constitution-Bill of Rights or even defended it - not even in their War of Independence or Civil War. These were accessories after the fact of the Uni-Godhead's ultimate purpose in the US people of Israel.

In the War of Independence, they fell into the coup set up by the wise old serpents of materiality, who could calculate how they would react. The wise old serpents wanted only that they adopt private banking, because otherwise they would adopt the new idea that came thru Benjamin Franklin of free circulating money - which would be like counterfeit money to them, and would make the interest-bearing money of the big European bankers worthless as the US grew.

All along thru history, it didn't make any difference who won the wars, as long as the people and their governments accepted interest-bearing money and taxation. But when the Communist Revolution came in Russia, this was the big blow to the world bankers, because the communists eradicated interest-bearing money and taxation; and not by making laws, but by the actual laying of the "cornerstone," which was the collective ownership of natural resources and industries.

The US people won the War of Independence, but lost their real birthright, which was to have a government of, by and for the people that printed its own money and regulated the value thereof thru the commerce of the people.

The Uni-Godhead could not get the cornerstone laid in the new US, because the masses of people had never experienced money or property communally, except in the 13 colonies under Franklin. They became religious colonies, but they didn't know how to put Christianity into practice. When the imported Hessians came, why didn't they throw a big party for them? Their persecutions in Europe for speaking out against usury, coveting and priest-craft had come with them as fears. So,

when the money-changers followed them to America, their preconditioned fears caused them to keep jumping thru the hoop; and right on down to these days most of them are still jumping thru the hoop. They don't know what a government of, by and for the people is.

THERE IS NO ENEMY

World Wars I and II, as well as the Korean and Vietnam Wars, all came principally because the US Citizens never laid the cornerstone when the nation was founded. Private banking originated out of Zionism, and Zionism formed the CIA. Then as the US grew, the CIA became more involved in the foreign investment of the world bankers, and gained control of the US military, foreign policy and the treasury. It is only at this time that the US citizens are finally beginning to wonder what is really happening! They have been caught up in all these wars and can't figure out what they were doing in the Korean and Vietnam wars, and even WWI and WWII.

For those who see the reality in this, there was no sinister part played in these events by any of the power forces involved. They were all doing things according to their understanding - that is, according to the way they have been programmed in their everyday experiences. The fact is that neither the US people, nor their supposed government, have any money of their own to spend; except money collected in taxes and given in welfare, or taken from the workers' pay and put into social security funds to be paid back to the people.

But about seventy-five percent of the tax money is squandered away for a false defense. All military defense spending at this time of the coming in of the Kingdom of God is for no other reason than to keep the people in the big military-industrial complex employed, and to keep private banking and private ownership of industries as an economic way of life. This is the folly of fools! It must fall! The Babylon money system is falling all over the world.

At this time we must see that the forces of antithesis versus thesis exist in every nation. However, a strong antithesis can't rise in any socialist nation, because the major industries are in the hands of the workers. The workers make up the government and the government heads are workers. Everyone in socialism works for the common good of everyone.

The people who attack socialism - on the basis that it has its ruling class, its hierarchy, and doesn't have equality - should understand the basic social science of socialism, which in itself surpasses any advantages anyone in it can take.

Any open-minded person understanding the world conflict cannot look at socialism as separate from capitalism in this respect. Socialism, with capitalism gone from the world, automatically becomes communism. When capitalist usury money

is gone, then socialist money no longer has relevance; and without money, socialism becomes communism. It is those people who are the capitalistic antithesis against the thesis of socialism-communism who have caused the need for the socialists to pursue the armament race, space conquest, etc., and have somewhat driven science in socialism to pursue onward into the illusions of material science.

But those people who are antithesis to the socialist thesis are not the bad people, and the socialists the good people. People are no more than what they are programmed to be in the kind of work or exorcisms they are in. All the nations yet under usury money are either dictatorships or religious and imperialistic hierarchies; and, especially in the case of the more democratic nations, are all duality governments with more than one party. The Soviet government is not a dictatorship when you consider the right-use-ness of material things.

And people can cry about religious freedom, but religions have nothing to do with the Uni-Godhead's planning for us, unless the people in religions turn to the basic truth in their religion. When they do, then they automatically become true communists. This is what the elect and myself would expect all the religions to do. And regardless of whether or not all people of religions turn to basic truth in respect to material things, the spiritual rules of the Uni-Godhead that govern all things are fulfilled by the elect, and all religions end. In this time of the final run we can truly say in regard to individual perseverance, "It matters not whether you won or lost, but only how you played the game." This applies not only to sports and battles, but to commercial games as well. There's nothing to win - there is only to end the old world and begin the New World Order. The people who argue against this New World are only arguing from the point of their inability to share, but total sharing of all material things is ordered by the Universe at this time and no group of people can change the order of these things to come.

I'm not trying to pin the fulfillment of the Kingdom of God down to any definite dates. I have revealed the true meaning of Daniel 12:1-13 in regard to the 1290 plus 1335 days. The 'daily sacrifice' of these verses was the Korean and Vietnam Wars, and it is called a sacrifice because the Gentiles are simply sacrificing their sons in wars to maintain private ownership and usury money. And in these wars there is no enemy. There are only delusions of grandeur. To this the Church Christians will say: "Gentiles! He is calling all of us Gentiles. Doesn't he know we are Christians?" The truth is, I don't know Israelites or Christians, other than by their fruits. The only way to tell who is a real Christian, Jew, or whatever, is by the things they do that are in first cause love services for all humanity.

However, I knew that when I came in secret to rise among the world people of Israel to build the Kingdom of God here these situations would prevail in the churches and temples that represented themselves to the people as Jewish or Christian, and the same with the other world religions. None of them are in a position to give the final unifying answers to the Uni-Godhead's program for all the people of this planet. I can give the kind of real truth that will make all the people free as they do the first works of the Uni-Christ mission, which are to unite the soldiers, workers, students and church and temple congregations into a fun World Wide Buyers' Strike to end the old world and begin the New World, in Truth.

I also know that because I have come as Emmanuel - God with man and woman - to represent the Uni-Godhead to Its people of Israel, then, as they confirm the Truth in all things and thereby become the people of Uni-providence, I am the one they will love as I have loved them. And what fault can they find in me?

From some of the talk that is raised about me in the more reactionary religious circles, and political circles affiliated with religion, I am Antichrist. They see the first book of the EG that has gone out as the work of Antichrist. So to them I am fulfilling a part of their Bible prophecy that is given by the Father God, or Solar Logos, of this solar system, which sends back to earth dual prophecy because the consciousness sent to the computer sun for rebalancing is in duality. The vain believe in God and something else they call evil.

There will always be yin and yang, because these stem from the negative and positive poles of atoms. Yin and yang cease to be antithesis versus thesis just as soon as the ONE IDEA of absolute freedom, security and abundance for everyone is established worldwide. Then yin and yang people work in harmony with each other. Because the US Israel's sister republic, the USSR Israel, laid the cornerstone for the right use of money and property, an avalanche of fear that turned into bitterness and jealousy was launched against them.

The people of the US had long been under the error of usury money. This is what the prophecy in St. Matt. 21:42-44 is revealing. This is a key prophecy, because when revealed in its truth, it shows the USSR project was the Lord's doing. And also, I have revealed why the US tribe of Joseph could not enter into the Kingdom of God mission because they had not come out from under interest bearing notes and taxation. The international banking group of this old dying world order, who are the Gentiles the Scriptures speak of, have evolved the International CIA Ring as their scout troops, protecting and securing their investments over the world.

"Gentiles" refers to the ladies and gentlemen not yet

confirmed into the Uni-Christ Idea - "the IDEA whose time has come now and cannot be stopped." It can't be stopped because it is of spiritual energies that are moving the whole world out from under a status quo preliminary period into a completely new, New World Order. Nothing from this old world order is carried over into our New World Order, except our social sciences, technological know-how, and talents and abilities.

Israel means that which "is real" and that's all it means. The word Jew, in its spiritual essence, refers to the same thing that the words communist, Hindu, Buddhist, Moslem, Brahman, Krishna - and the names of other similar spiritual teachings - refer to, which are all from the same UNI Truth. All the world's spiritual books have come through evolving groups of people on this planet, and are their interpretations of the Cosmos or Macrocosm.

The purpose of these writings of the books of The Everlasting Gospel - spoken of in Rev. 10:1-11 and Rev. 14:6 - is to synthesize all the spiritual teachings of the Truth, bring them all up to date in regard to their validity, and give the World Master Plan that brings in the Kingdom of God at this time.

No one can argue against a One World Company in which every person is an equal shareholder according to ability, having free access to all things, where each single person and family unit has one place of their choosing where they live which they can call their own and is their private dominion.

There is antithesis and thesis, but there isn't Christ (a person) and Antichrist. Those of antithesis, by their contradictions and plots against Israel people, are only forcing the people to rise and take over the world and run it properly. When Israel people do as they should, then those of antithesis will synthesize with them. When people cannot solve life's problems in the Truth that serves all people, then they hallucinate up some kind of villain to blame for their troubles and use as a means of debate, sloughing off the real issues that they should talk about.

Progressive people couldn't care less about the reasons people give as to why they are not in first causes and true to life and unto each other. I only know that, in these last days, it's either be a true child of life, nature and the Universe, or lose out this time around. I'm not going to remove the chaff from this planet. From the year 1914, when the polarity of the planet's aura was reversed from its negative to its positive phase by the Uni-Godhead's ETI space angels, those of the chaff have been so busy removing themselves from the planet in wars and by disease that they can hardly build caskets fast enough to bury their bodies in.

I don't know why they spend so much time making caskets and having funerals for bodies when the entities in the bodies

have already risen into their heavenly abodes in the planet's aura (Read Rev. 6:7-11). These verses are telling of the righteous dead who rose out of the WWII Armageddon. They are in heaven where white robes were given to them, meaning they were cleared of the folly of national war. They have reincarnated as this generation of flaming youth, who aren't going to carry guns for the moneychangers any longer. These are the ones who had been sealed in their heads - who had lived the Uni-Christ Idea and had built thru their good works a positive aura in themselves that would bring them back here to reincarnate and to be here for the climax, when the harvesters of the world inherit the planet and leave time behind, crossing over into eternity again. These people are keeping up with the stream of Uni-Consciousness that produces good works and at last delivers them.

However, many of them did not return and were farmed out to other planets where the same kind of healing is taking place as has been happening here. To be lifted from a Carlanon planet is like running a foot race with yourself in right-use-ness of all things. If you don't keep up with the harvesters in the race and fall too far behind, then it's obvious that you're not going to be among those who finish the race. It doesn't matter who is first to cross the line, but only that you keep up and receive your wings in the wonderful Cosmic Initiation that's coming up very soon, when ETI space beings intercept earthlings. Here again, people have reasons why they fall out. In their reasons, there is no reality out of which a true science can be built to help anyone, because the 'race' is only in setting up the world system of total sharing. Now, what's so difficult about doing this? Everyone can do something to help bring in the Kingdom of God.

There can be no end to war, crime, disease and poverty for you until you share all things mentally, then it will automatically follow that the ways and means of sharing all things will be set up all over the planet. Things are already set up in the Socialist countries for sharing, and they are on their way into true Christ Communism and can't miss. They can get rid of money and go on without it, but people under capitalistic effects can't without their whole economy falling apart.

The people under usury money can unite and move from here to there in one big step through our World Wide Buyers' Strike, though. They don't have to overthrow the so-called capitalists in order to rid themselves of usury. There's only one thing left to do, and it's to begin to organize a real passive resistance, legal civil disobedience movement that will cause all things that are not part of our New World Order to fall out of the picture. This would end the world of mere jobs that earn money and produce for secular profits. There would be no work in that sense to do, and everyone would have

a thousand times more at their fingertips for their use than even the most wealthy people have now.

Amazing! Can you see why? It is that money has been an atonement used to structure the people into service for each other. Money atonement was the only way ETI could bring earth people into building a social structure; opening up the tree of knowledge, so to speak, thru the world of effects. Wars, overt acts, degenerative diseases and poverty would result, which are only the effects of the people's wrong causes. All of this would spur science and technology on and the science of treating effects would rise.

The world population would be under many national governments, and they would each have their military, police, prisons, judges, etc. - most of them believing they were in the world of reality and that there really were bad people, that there were diseases caused from germs, that national defense was necessary to stop the enemy, etc. It would all seem real to them until they were opened up to the truth of cause and effect, karma-retribution (retro-action). This is the law thru which the Universe governs all life. No one can heal negative effects such as war, crime, mental & physical illnesses and poverty until they use this law.

No person has risen into the higher state of Uni-social awareness and soul integrity until they know that for every *cause* there is an *effect*. For example, when a man becomes a soldier for a national power, he is the effect of a wrong cause. He is being trained in the art of killing. Everyone knows that this is wrong from the word go! This illusion goes on legally because the masses of people have not known the truth about the military and the governments that sponsor them. The world of effects!

All the people under usury money, who serve the "blind who lead the blind," are now confronted with the reality of "communist power," which arose out of the negative effects to end them once and for all. The socialists have organized an economy that is showing the whole world how to have abundance for everyone and eradicate war, crime, disease and poverty - which they have nearly accomplished in the Soviet Union.

What I'm pointing out is that Soviet people suffered great devastation to their country; some twenty million people were killed in the WWII Armageddon, and this has caused them to pursue armaments and keep up a strong military force. They see that people under capitalism's effects can still be regimented by their old world establishment to support imperialists going in to nations where democratic people are rising to bring in socialism. We saw this in Korea, Vietnam, Africa, etc. This rising of the people is more of a rising into common sense than it is a step on the path that progressive economics would follow to arrive into the communist era.

I'm pointing out that the next big step in the World

Revolutionary Movement is the one where the workers in big industries take them over by communalizing them. Instead of the national police and soldiers supporting the old world establishment's ideas of private property, they would reinforce the Lord's communal ideas (Acts 4:32-35). In the past riots in capitalist cities, the police and national guard could have supported the Revolutionary People instead of the old world establishment. Then there wouldn't have been any fighting.

The laws of the land are written to uphold the government. This is misconstrued to mean that the government is the elected body. This is false. The government is always the people, and the people can abolish their establishment simply by uniting and doing the things the US Constitution-Bill of Rights tells of. The progressive legislators (and it will turn out that ninety percent of them are progressive) can support the government of, by and for the people when the majority of the workers, police, soldiers and students unite with the Everlasting Gospel's World Master Plan.

I point out that it has been necessary for the Communist Party to build a strong Socialist Bloc. They have accomplished this, but from here on in they should unite with me just like they did with Lenin. The things I'm showing to the World People of Israel now, we could say, are the greatest social discoveries of all time. And it is simply that *love as services done* - and words spoken on behalf of all people in accord with the proper linguistics of the Universal Mind - both go into causation and, of themselves, create a nonviolent World Revolution that changes the whole world. By the time the EG's World Master Plan has been widely accepted to the extent of carrying out a World Wide Buyers' Strike, then the spiritual changes in the vast majority of people would already have taken place so that it would not be necessary to carry out the strike.

But as long as the world is divided into two camps, where the socialists are talking about things from their experiences and the people under capitalistic effects are talking about things from their experiences, then the true world of communism cannot come about.

Everyone can ultimately understand Universal Communism, but only socialists living in socialism can understand it now. No one can ever understand capitalism, except to know it's a cyborg beast that keeps sounding in your head from the playback of negative mental seeds that have been sown.

Free enterprise industries, and most US people, however, are ready for a big change - bigger than socialism; a change as big as Universal Communism. Even if the whole world were socialist, communism still couldn't come into being. The time when true Universal Communism can be brought about is during this time of world conflict. Were the world to level off into

a thousand years of socialist peace, it would be a forced peace, and still no true communism would come.

To get into the PSI synthesis energies that ETI is in, and to comprehend the high beings' action, we must see that their action is directed to clean up the whole planet now and make all things perfect here for a completely new New World Order.

ETI will cause the World Communist Movement to direct the occupying of the whole planet, and to set all things up just like this World Master Plan tells things will be. It's really a "do or die" situation.

No one can say, "Well, it all sounds good; but I'm not into the doing of it, so I'll wait until it comes and then join." Sorry friend, you haven't the kind of nerves of steel that it takes to look and then leap. Look around and let your eyes behold the New Age being born, and the coming of the New World Comforter who can lead the whole world into the wonderful things that are to come without further karmic cleansing.

When things about you are cast in old superstitions and fears, it takes nerves of steel to go out and tell people how to build a heaven on earth. Absorb their fears and doubts, knowing that you are not talking in vain, but are sowing the mental seeds that will take root in the people who shall bring them about. Know your efforts are not in vain.

The things people under socialism are experiencing are in many ways worlds apart from the things people are experiencing under usury money. Even so, a great community-based communal movement is growing in the US. Many of the people have had all the things money can buy and have not found them gratifying. They know they can build most anything, but for what reason? The incentive to go on building and trading is going fast, and this is good. The furthest reaches are being explored and the truth of the Universe is slowly but surely becoming known.

It is astonishing to say the least that the workers of any industry, the students of any place of learning and the soldiers of any army can rise into full command of their institutions simply thru acting on the intelligent democratic ideals they already agree upon. As of yet they don't know how to act upon them, but with the spreading of the EG, they soon will.

Who could disagree that there should be and can be liberty, justice, equality and pursuits of happiness for everyone? No one in their right mental attitude can disagree. Everyone can see how these blessed things can come about and become absolute freedom, security and abundance for everyone.

Some would say: "O, when people don't lie, cheat, steal, flirt with another person's spouse, and stop sinning in general, then the New Age can come about." These people are as blind as bats to Uni-Godhead's ways and means. Lying, cheating, stealing, adultery, etc., are only the effects of

the wrong economy. The real sin or error against Uni-natural law is buying and selling, wheeling and dealing in merchandise, vainly believing that when all people are satisfied in material comforts then all will be well. This falls far short of the real stuff in atoms we are made up of. The Universe rules us and calls us on into the perfect state of Universal Communism - a great One World Communal Democracy.

The International CIA Ring and Zionism have been as important to progress and world changes as the socialists have been up to this point, because there would be no socialism unless Gog had created the contradictions that forced people into socialism. In other words, why couldn't the people read Marx and democratically take it from there. We shall see if the people can read the Everlasting Gospel, which is the synthesis of Marxism and the Scriptures, and build a Heaven on Earth now; or whether those of Gog (CIA-Zionism) will be led by ETI to do their last big overt act, which is to force the world into the last part of Armageddon.

Make no mistake about this, because CIA-Zionism has the power in nuclear missiles at their command to force the big world showdown. Socialism is a big thing, but even a child would reason that a world nuclear Armageddon would end all world systems and would so shock and dehypnotize the world people that from then on they would set up the sharing ways and means in all things.

I'm not saying socialism will or could be destroyed in the "last war for the world." Uni-Godhead tells that those in the land that is brought back from the sword, which is the USSR Israel, shall dwell safely in the last part of the world conflict. But they do have the big job of defending the cause of revolutionary people who are rising in every nation outside the Socialist Bloc.

I have revealed who the 144,000 are, spoken of in Rev. 14:1-6. They are ETI incarnates here on this planet who are telepathic with ETI space command. There are some two million of us. We are not socialists, and neither are communists socialists, but socialism is only the step communists would build to bring the military into balance and show a kind of collective economy and growth of technology that would inspire people into radiant social changes. The elect of the Uni-Christ ideas are oriented to carry out a World Wide Passive Resistance Movement and World Wide Buyers' Strike, but to do this in a big way we will need cooperation with the Soviet Union and Red China.

We know the quarrels between Soviet and Red Chinese Communists are purely about what true communism is and the ways of bringing it about. Neither of them could know the truth until the Spirit of Truth came with the World Master Plan. So if ETI personnel on the planet, some 2 million strong in key places in every nation, cannot successfully offset the

last war for the world thru the World Wide Passive Resistance Movement and World Wide Buyers' Strike now, then we will succeed after the tribulation period.

Already Gog moved up against Russia in 1919-1921 to force the USSR to be born, and then again in the WWII period to cause Soviet powers to grow into world prominence and gain territories. If a karmic cleansing revolution must come up against the US Mountain of Israel to force the US tribe of Joseph into their world destiny mission, then Gog brings it. This is already determined by the light that is in the people.

Let your light so shine that the Omnipresent-Omnipotent Universe might see your good works for all humanity and glorify them. A person's light is in relation to their individual aura and reflects the righteousness they have applied. Their collective consciousness is negated though, and is recorded in atoms and playing back into their headset animating them on in the same old quarrels that have always been here. The quarrels are: "How shall we produce our daily needs? Who shall produce them, and who will be the rulers or the leaders?" In the true order of communism, all the people share in the creating of all things needed, and no rulers or leaders, as such, are necessary. Everyone comes into their place according to talents and ability.

As long as people thought God was a man, then Gog would rule them and all spiritual teachings would miss the point. But now all eyes will be opened to the astonishing fact that all the quarrels between ideologies, and battles between groups of people, are simply the playback from collective mental seeds sown in the planet's akashic records. Many millions of people will be killed during the 1290 plus 1335 days of world cleansing unless the EG's World Master Plan is brought forth by the World People of Israel now!

CRIME A NATURAL REVOLUTION AGAINST UNNATURAL CONDITIONS

All the commercialism earth people have engaged in has caused the judiciary, penal and military systems to grow into monsters. It is all only effects, along with crime, degenerative diseases and poverty. All of this is playing back from the akashic records, the mental library earth people have so far recorded in mental seeds, which is animating them on the same old trips. Earth people, of themselves, cannot change unless a super idea is given to them in a World Master Plan they can all follow, which is entirely different from anything they have now in their established social forms.

We could ask why the socialists have gone on with the judiciary-penal system, prisons, money and the military. Why couldn't they have ended the penal system in the Soviet Union and put their wayward people in a Garden of Eden communal project, where they would be loved, lifted and helped in every

way? Why couldn't they give them the necessary supplies to build with and let them run their own affairs?

As open-minded people can see now, love thru service, and loving your so-called enemy, was and is the answer to so-called crime. Why didn't governments do this long ago? Simply because of the anger and hate they experienced with people who, to them, betrayed their cause or were deterring their hard won progress. That was their reality at the time of judgement. But the facts are that all negative emotional responses are from the cyborg beast, or red dragon, which is of people who are mentally subjugated by old world karma and can't help open the gates to let the New Order come into being. Any kind of hate, anger and ill feelings that penalize are revengeful. The harm some people have done to progressive movements and individuals can never be undone by penal law. Penal law only extends the contradictions and confusion that could have been resolved by simply loving, helping and lifting each person regardless of what they have done. If it's necessary to separate some people from society at large because they cannot function in society peacefully, there would be a beautiful city or university project to put them in - both men and women, and their children, together. The only difference in their project and the outside world would be that their project would be true communism, absent of all old world incentives and controls from the outside world.

The truth about all overt acts is that people of themselves did not do them. Each person has an emotional time track, and they can only be cognited into the collective akashic records, recorded in the planet's aura by all people thru their emotions.

Everyone in degrees feels love, hate, selfishness, giving, possessiveness, joy, sorrow, etc. When all people have love as service done, and they are the love that produces it and bless themselves with it, then there are no longer such emotions as those that have been prevalent here.

Society itself trains men to be soldiers and instructs them how to kill the enemy. They train men and women to be police, arm them and train them how to handle jawbreakers. Society puts people in prison cells, etc. and all the things that our great society does are of similar negative effects, which shows they do not even have the basic truth to live by. The Christian Scientists have had these basic truths, but they are not a spiritual revolution. Jehovah's Witnesses have greater Bible awareness and they are a kind of revolution.

How come the Christian Scientists can't be a radical movement to awaken people? They have so much truth to give. And how come Jehovah's Witnesses, in ways, are stirring up a storm that backfires on them and does not get the real work done? I'm pointing out that people can be so scientific that they lose the everyday spirit of building a kingdom - which is

never in the future, but is always now. People can be so hung up on a religion that they cannot see the down-to-earth practical applications of spiritual truth.

This is called ignorance of truth, or people being stubborn and not wanting to change. The results are that many people are persecuted for the cause they think is true. Many people die in battles for causes they think are true. Many people are left homeless by wars, and in general, everyone in war zones suffers.

Prices go up, up, up in inflation, because people value their profit-seeking more than regular standards that keep people together in a natural growing experience. People lose their jobs because of recession. Yet there are more workers than owners of businesses. Labor unions that represent the working people hold more power than the owners of businesses, industries, etc. Why don't they turn on to the democratic ways that are already legal in the "Bill of Rights" and do something that's really outstanding, like organizing one big strike that ends their present world and begins a New World?

There's a new feeling growing that guilt, accusing and judging are not things that can be assigned either to individuals or the state; that the guilt is, rather, something to be shared by everyone, in some mysterious way. But it is not mysterious at all when you know relativity is built into atoms to cause love as service to dominate all things. In many tribal societies it is a familiar reaction, instead of accusing someone for having committed a crime when some hideous act occurs, for people to say: "How horrible it must be to feel like that."

The feeling of not judging people is becoming an aspect of the new mass culture we are rapidly moving into - a New World of total involvement, in which everyone is so democratically involved with everyone else, that no one will have private guilt anymore. Everyone is guilty and innocent at the same time. There's only error against Uni-natural law, so let's correct the social errors by creating the proper social environment for everyone.

The love of money is the root of all evil and ills, and it is doing people in. They love money by thinking it is the only way to regulate people and to have trade among nations. Most people say: "O, we have to have some kind of exchange, trading or bartering, in order to be independent. And I must have some things to call my own that are protected by law, etc." They say all these things because they do not have the vision of the World Garden of Eden. They had better get the World Garden of Eden vision before the allotted time runs out and is no more.

THE WORLD HARVEST

In no way does ETI, which is directed by the Universal Mind omnipresent in atoms everywhere, do anything in the delivery of the world harvest which is not beneficial to all people and must be done for their own salvation. Billions of beings on the planet now, and billions more in the planet's aura in heavenly abodes, are to incarnate here and reach the transcendental mental state, so as to have an eternal body again and live in eternity with the Universal Family. Several billion entities have already been redeemed from this project in the past two hundred thousand years and many of them are now serving with the Galactic Command Space Complex - GCSC - and are assigned to the delivery of this planet.

Earth people still haven't evolved to the natural state where they, of their own right-use-ness applied to material things or of their concern for one another, can deliver themselves. Looking in four directions, we see that national arsenals are filled with creepy crawling things, and nuclear missiles are in berths ready to be fired. If it were true that the divided nations were left to their fears, with their missiles to be used in a world freak-out Armageddon, then such an Armageddon would surely come. But the truth is that ETI space beings have direct control over all nuclear missiles and will prevent their use in a big world freak-out nuclear war. The terms of a greater detente are sent out to all big cities over the world as to what they must do to prevent their own disaster. They need only to simply follow the details of the World Master Plan revealed in these pages, and bring about the total sharing of all things.

The redeemed people from this planet do not work for the Galactic Command Space Complex. They do not get paid wages. Would the GCSC have stores - where the people buy back what they produce from the 'company owned store' which makes a profit off of the people - in order to build its space ships and carry on with it's assignments?

Go ahead and laugh! Earth people are really funny, very funny indeed. "I won't work unless you give me an all-day sucker. You pay me and I'll do the work." Such folly! No wonder the people are exploited. Naturally, the people of the GCSC don't have time to fool around with money. If their vibes were that low they couldn't maintain themselves and deliver earth people. They are not delivering earth people thru money, the judiciary-penal system, the military, the banks and business as usual. They will deliver the world harvesters absent of all these kind of shenanigans.

All the killing of people and the destruction of cities that will come, if the EG's World Master Plan doesn't lead the way, is done by the people themselves. Even their earthquakes and freak storms are manifestations of wrong use of mental force - the cosmic life energy. Our love as services done for all people controls the weather and all things.

The chaff is being separated from the wheat; and the world harvesters, in spite of themselves, are coming forth to inherit the earth - which so far they haven't been able to inherit through right ways and means, but only thru being kicked into it by the backlash of the Uni-energies they negate. In other words, people can turn the negative and positive poles of atoms around, which are yin and yang and on the earth plane would be representative of the right and left wings, or antithesis verses thesis. But when they do, then the space and matter atoms into which they sowed their mental seeds build up a static charge, and finally the atoms automatically reverse their poles to balance energies again, and in the meantime there's hell to pay. Then those satanic or luciferic energies take possession of them according to their karma. Emotionally they cannot stay in yin and yang mental polarity balance. They are possessed to the degree of animation beyond their ability to reason, and because they have military units, they use them to work off their bad karma. But it's better to have their exorcisms take place on battlefields, under a military game, than to fall under a survival factor that affects the general population.

The common people have no knowledge of what civil war or revolution is. They know there are two sides in a struggle, but they don't know that the struggle is caused from the mental seeds they have already sown into their nation's aura that have cast them into paranoia so they can no longer reason.

The dissension between classes in the US now is frightful! The controlling classes in the US think they can control the people through the news media. They think that if they pacify the people on the surface, not telling them the truth about socialistic progress in the Soviet Bloc, that finally the opportunity will come to them to get the kind of war with socialism that they can win. They never can! In the November 1975 meeting Gerald Ford had with Red China leaders, what did they talk about that they couldn't reveal to the people? Did they talk about the real issues at all? I tell you that the split between the Soviets and Red China is only of surface things, and when it comes to basic truth, the Soviets and Red Chinese will be united. There is no way for Uni-Christ Communism to be compatible with satanic cyborg capitalism. Capitalism is the dragon that is cast down and out.

The vain religionists still play their demon-possessed parts of fallen angels. Their teachings come forth in ways that create more dissension from the churches. "It is the truth that makes us free." As it will turn out, the demons are nothing but negated vortexes of thought energies. And as for fallen angels - if any of them fell, then the Father God would only have to find out what he did wrong that caused them to fall.

Since the Universe is the God in question, and the Universe can't judge Itself, then It could only heal the weakness in Its system thru which erring can happen. The other side of this is that all the suffering of people is brought on by themselves, individually and collectively; and they can know the Truth, live by it, and end their suffering. Most of the soldiers under capitalism know what they are going to war for, and many are haunted by the righteousness they never acted upon that would have kept the peace. Now there will come a Union of Universal Soldiers that will act to keep the peace. In this last part of Armageddon, if it has to be, there will be generals of high ideals on both sides who will influence the soldiers to unite together for the real peace that can only come when the military is completely disposed of and the world is disarmed. It is written that we shall reap what we have sown and that those who lead others into captivity become captives themselves. The so-called "free world" is a captive audience in itself. They are spinning, so to speak, in a computer and can't stop the computer until they come out of this old dying world order in mind and enter into first cause. Whether they do or not is of no large consequence other than to themselves. The Americans think of having private property and their own money as their way of freedom. It's all they have ever known! The cornerstone was not laid in the US when the nation began (St. Matt. 21:42-44) and it must be laid right now if the US citizens are to stop their karmic cleansing revolution. There's only one sound way for them to lay the cornerstone now (the stone the builders rejected), and it's through the organizing of the World Wide Buyers Strike that I have outlined for them.

"With what judgement ye judge people and property, in that shall ye be judged", "with what force ye meet a thing, in that shall it be measured to you again", and so on, until all the laws of the Uni-prophets ring true in the inward parts of the world people of Israel. In this last "World Revolution" part of Armageddon, all forms of secret military operations will only emerge to face the same question that all soldiers in battle must eventually face. It is the question of Universal Peace which comes when there is no longer any cause for wars. The cause of war is secularism; and secularism has caused the usury economy of capitalism, which has only been able to sustain itself through war and, at this time, will not survive the "Last War for the World," in which Christ forces inherit the whole planet.

One man of the world said: "All I have to offer you is blood, sweat and tears." Why would he say such a thing? Only because he had no superior imagining. In every world crisis there is always the Universal Christ way in which to solve all problems. But the people are slaves of their past conditioning that is recorded in their planet's auric time track, which in

turn animates them; so in no way could they enter into the Kingdom of God organization until they were *born again* of Its spirit.

Many are called but few are chosen, because few choose themselves to be. To be or not to be is the question! To be called into an orthodox church, as they are now, is just to go into a building. But to be called into the Messianic Complex is to take up the symbolic cross and carry it on into the final fulfillment of a heaven on earth, which comes when a majority of people will no longer obey man-made laws. By this I do not mean that they will not use common sense, but I mean that their righteousness in action will make man's laws obsolete.

Man's laws and legalities are only accessories of the buying and selling world and do not apply when the people form the kind of democratic revolutionary movement that will end the old world and bring in the New World. It's simple to stop the whole world and, at the same time, keep the necessary services and supplies rolling by ending the buying and selling of our daily bread for secular profits and making all things free. No one would lose anything of value and everyone would gain a new kind of life so wonderful it's hard to imagine. We will end war, crime, disease and poverty all in one big challenge - forever. All tears will be wiped away and all things will be healed. Everyone will have everything at their fingertips to express their creativity and to help produce ten times what is now produced and it will all be done through joy and in the highest quality.

The whole status quo period has only been a time when Israel people would prepare the world spiritually and industrially for the Kingdom of God. Then, when the world harvest is ready, the Uni-Godhead's super angels of light come out of space and deliver them and they do it in such a way that the greatest harvest of people can cross over. All those we lose in this wonderful Cosmic Initiation we have to deliver on another project planet. So we of ETI are anxious to get these kinds of tasks completed, then we can return to other things that are a lot more fun.

One thing is for sure, though, and it is that the people will go on reaping what they are sowing. There is that element of will power, however, which can make the difference between failure and success at this time. A World Wide Buyers' Strike, well-planned and carried out now, will cause all that's inferior to fall out and the wonderful ways and means of sharing to come into the hearts and heads of all people.

It's possible to grab yourself by the seat of your pants or panties and make yourself do what's right for everyone. Once you get yourself into the doing of unusual things with all those that will be of our World Wide Buyers' Strike - as a student and a worker of the Universe entering into all the

joyful things that will bring absolute freedom, security, and abundance to all people - then your first cause adventures become total liberation and the energies shall come to you that carry you on through the storm with your head held high to at last see the sun come shining through the crazy haze all over the planet.

It's simple for the world people to inherit the whole planet and end all squabbles. All they need to do is join together and carry out a World Wide Buyers' Strike in which they stop making all payments and bring an end to all superfluous labor and production. At the same time, they would set up free dining halls in churches, schools, colleges, etc., and would keep all the services and supplies going that are necessary for the World People's Christ Reformation. These are some of the simple things a united people can do to put the whole world in tip-top shape. War, crime, disease and poverty will be abolished forever and an end comes even to what is called 'death'.

The US of Israel and the USSR of Israel are determining, thru détente and reaction to détente, whether or not the world shall be changed by passive resistance and legal civil disobedience or by the "Last War for the World," the major part of which happens in the Middle East and the US America. I do not call it the United States, because there are no United States as yet. Every presidential election shows that in America there are only states which are divided against each other in voting for Republicans or Democrats, who are either right or left of center. The Soviet Union has a collective economy which is not torn by two parties, one trying to maintain business as usual (Republicans) and the other trying to break away from business as usual (Democrats). Because of the propaganda and fear in the US about socialism and communism, the more progressive Democrats do not speak out their true feelings because they fear being labeled as socialists or being allied with them.

Americanism is supposed to be something special and unique. They call it the American Dream. It is cast in the illusion of nationalism, whereas the United States is something else entirely and in fact has not even begun yet! Its destiny is intertwined with the USSR tribe of Judah. The United States is the tribe of Joseph. The US will soon be born and will be a communal democracy. The Soviet communists will begin to talk about communism instead of socialism.

The very teachings of Marxian socialism coincide with the teachings of Jesus. What the Soviets have accomplished is the overcoming of usury and coveting; but as long as they use money, they will still have a certain amount of capitalism. Some Marxist-Leninists see capitalism as people, but capitalism isn't people. It is an evolved system of expanding consciousness, coincident with solar plexus energies.

Socialism came when the expanding consciousness of the world people had reached into the use of heart chakra energies, which are ultraviolet rays of mind force. World Communism is coming now because expanding consciousness is reaching into head chakra (common sense) energies which are gamma rays of the synthesis.

Naturally, I believe, as the Uni-Godhead *knows*, that all things are working together for good unto those who love life and Its nature and are called according to the Universe's purposes. The Universe has no enemy in anyone. The Universe, thru Its atomic body, is programming perfect harmony thru freedom, security and abundance for everyone. All things are always healing. Then why don't earthlings have the perfect state of being? Are they dumb? No, they're sharp as a tack! Are they stupid? No, they are sly as a fox! What's wrong with them then? They have never had a World Master Plan to carry out until now. They have never realized what God, spirit, democracy, detente, economy, church, government, etc., are until these channeled writings from ETI-Godhead came to them. I Am truly Emmanuel - God with men and women. Can't you see this by what I write?

Most people are subconsciously controlled or influenced by the idea of a man-God, a god of wrath that is angry with a sinful wicked world. He supposedly sent his only son to earth where the church and state entrapped him and the howling mobs decided that he should be crucified. The church and state knew what the masses of people would do from past conditioned reflexes. Things have been happening the same way down thru the ages until at last the World Nation of Israel was born in Russia with communist leadership.

The latter day church of the Uni-Godhead was the rise of Christ Communism from the works of prophet Marx. And now the communists have the largest united church congregation on the whole planet, united not by the doctrine of the Bible but on the thesis of the Lord's Prayer which has three important ideas in it.

The overall idea in the Lord's Prayer is that the Kingdom of the Universe would come upon earth. The three ideas in the Lord's Prayer are: "Give us this day our daily bread, forgive us our debts, and lead us not into temptation." All three of these ideals were fulfilled for the Russian people by the Communist Party. How come the Communist Party can't rise up and accept their Universal World Destiny Mission? What a shock it must be to finally know that you are the real spearhead of Christ Universal Consciousness and must either get it on in Universal truth or have greater Communist Parties rise that will make past communists look like politicians who took personal favor with their own seeming importance.

How were the Russian people fulfilled? Well, as far as I or anyone can see, in economic principles, when private

property and usury money are taken away and in place of them is put public ownership of all things, then every person will have their daily bread and will not have any debts and could not be led into temptation from being divided by church and state. But rather, they would be in unity to defend their collective territories. The fear of communism which is spread in nations yet under private banking, etc., is void of Christian truth. The word "atheist" opposes the man-God idea and has been used by communists up until this time when I would come and set the records straight. All the meaningful words have taken on negation from the past misuse of them.

For example, the word "communism" is one most beautiful, meaningful word. But when the word is used in a group of people, some of them will immediately begin to react in negation. So it is with the words: esoteric, metaphysics, parapsychology, Judaism, Christian, Jesus, Lenin, Hitler, Stalin, Roosevelt, etc. These are all only names. Learn to see beyond preconditioned associations and know the truth of all ideas and things. It is necessary for world leaders, and all people who are going to influence right changes now, to begin to see the social order from a different perspective. Come out of this world and take a good look at it, and then compare it with the Universal Matrix. You'll see that what each group of people does is only their responses to the vibrations of energies they are associated with.

We see that politicians preparing their political speeches are very careful in the words they use and how they use them. This is because they want votes. So they only say to people the things they want to hear. The human psyche is master at winning friends and influencing people to get followers. Why would any normal person seek friends who only voted for them, and yet were subjects of a system that no politician could change or even bring real benefit to the people thru?

Christ Communism is not a charity world. There are plenty of so-called charities that soothe the conscience of people who believe they are helping the poor and starving masses. Charities are simply an effect of another effect, which is the buying and selling of goods and services for secular profit. The people are caused to buy and sell because they are under usury money. The wars since 1914 have been caused because the people who thrive in the usury money business can't keep enough people employed to make interest-bearing payments on their bank loans. War is a way of creating artificial spending, which is what capitalism is, among other negative things. Out of the establishing of the World Nation of Israel in 1922, when the Soviet-Russian territories were declared a Socialist Republic, came great purges against persons who reviled against the new order. They were the reactionaries who supported counter-revolutionary groups that tried to usurp the communists from power.

It is clear that the leaders who led insurrections against the Soviet State Communist Party had intentions of returning Russia back to the old-world banking system. And the people who gave them support were obviously those who were feeling the great changes that had come but could not change themselves so as to be able to obey the "powers that be" and give the new socialist idea the chance to prove its reality. There were Old and New Testaments all over the place that told of the time when the Uni-Godhead would establish Its world nation. And they told of the great troubles that would come about because many people would not know what was taking place. They would still be in mortal mind and thinking in terms of dollars, instead of knowing that the Universe's promise to all the inhabitants of the Earth was a Kingdom that would be established here on this planet by the elect.

And as far as the Old and New Testaments are concerned, they have in them the writings of the prophets of the two main religious hierarchies that have persisted on down thru the ages which are Judaism and Christianity, as well as the main-line prophecy given by ETI space beings who set this dispensation up about three million years ago according to earth time. I am ETI and reveal the truth in the scriptural prophecy. Only the prophecies in the Old and New Testaments that are of "one unit" in all things are of the truth. All prophecy that deals with duality (we and they, good and evil, Christ and antichrist) are in the illusion of people thinking that they are true Jews or Christians simply by association with temples and churches and their God ideas. Not that they couldn't be, or that the church and temple Christians and Jews cannot make a definite contribution to the establishing of heaven on earth now, because they surely can unite together on the One Idea and do as Uni-Godhead declares to them in prophecy.

THE "ONE IDEA" ABOVE ALL DUALITY CONCEPTS

It has long been argued which religion is the true religion of God. All this kind of arguing ends now. The Lord, so to speak, comes as a thief in the night to rob the nations of their ability to go on playing their silly political games as nations. Nations and their national boundaries are the biggest hang-up and also the biggest source of squandered labor thru their erroneous games of policing people and boundaries. There will be One World Nation and a one world government that has no power over life and death. The only purpose of government will be to make life as happy and healthy for everyone as possible. The possibilities are unlimited! We shall operate an unlimited government, a government that expands and has no need to police its populace. In governments that police the populace, the

politicians are only admitting their failure to administrate objective government. All the beings on thousands of neighboring planets operate within the grand atmosphere of absolute freedom, security and abundance. Earth people can and will be united with them; but before they can take the last step into the Kingdom of God space organization, they must get into Universal Consciousness where mentally they let go of all things that are not of the *one unit* of all things.

Each person can mentally let go of all things that are not of the one unit by letting go of the things they possess, such as money, property, buildings and persons. However, letting go of things doesn't mean giving them away. Here's what it means: In all business procedure there is the front end of it and the back end. Letting go means to let go of the back end and operate within the front end. This means you would let go of all ideas of legal process and governmental control, and only gain use of property to put into communal free enterprise for all people entering into your group.

You would gather people into cooperation with you on a total sharing basis, with no wages paid and no taxes to pay. Your communal corporation is already chartered by Nature's God in the US Constitution to be tax-free. All profits would go towards the full living experiences of the people involved. As a communal group holding all material things common, the living quarters of the people would either be bought by the commune, or be built by them. This would be true of their industries also.

There are plenty of multi-millionaires in the US who are looking for new adventures and could begin to do this very thing. They would advertise in the paper for people who want to enter into such communal living experiences. They would get thousands of replies. And in no time at all they would gather the most talented people who are interested in such noble projects in which the people who operate them collectively would have all things added unto them as their Communal Free Enterprise unit grew. The people around them would see a unit of the Kingdom of God organization functioning in their midst. And soon all people would want to be in the communal lifestyle, which has actually set them free and brought them into the kind of spiritual discipline that all people agree with and know is needed in order to function with a large group of people.

All would have use of the same properties and will be busy creating the advanced technology that will far surpass the present kinds of movies, TV, telephone, radio, transportation, electric power, etc. A whole new world adventure is opening up! People like Henry Ford and Howard Hughes began to dream of such communal adventures in free enterprise. But the consciousness that would bring it about, the mental energies or vibrations, was not present in their time. The whole world

is changing as Uni-Godhead's spirit is being poured out upon all flesh - which in science means that ETI space beings can tap into the high auric energies of their celestial realms and beam their synthesis energies into this planet's aura. In this way the whole planet is cleansed, purified and healed of all negative effects.

The cleansing process began in 1914 and didn't turn positive in many people until the 1960's, with the advent of the flower children, a new generation of youth coming in on higher vibes. When these high PSI synthesis energies first began to be beamed into this planet's auric field to act as the catalyst, they caused the negated energies in this planet's akashic records to begin to play back thru all people. And, according to their karma, the people were forced into world karmic cleansings. This has happened in all the wars since 1914. The wars and purges that have come are nothing more than people being under paranoia. The truth is that when people are mentally and physically ill, it is from lack of energies. They are suffocating to get a shot of balanced energies, which they can't get unless they can get away from the things they are caught up in, be apart from them and be able to take a good look at both sides of the dual situations that bind workers to jobs, politicians to enforcing laws, etc.

Let all people have the knowing now that many things are the opposite of what they appear to be to mortal mind. When you are mentally wracked with paranoia and suffer from pain in your body and soul, you are actually in the process of healing, and you must heal when you have vision of the way to heal all things. (Part of the healing is to put only natural foods into your body.) People can't do this easily as secular family units. They must form into collective groups, holding all things common, to manifest the energies of a group aura from which they can be energized.

People in churches and temples are supposed to be accomplishing the Christ things. They can't, though, until they have actual projects going that liberate their people from the Babylon world of usury and coveting. Small business people and professional people make up the mainstay of most church and temple congregations. They can all read what Jesus says in Acts 4:32-35 about becoming a commune, and they can read in St. Matt. 21:33-40 what Jesus tells will happen to those 'ungrateful husbandmen' who try to go on with private property and private money after the Lord has come in secret and given the EG's World Master Plan. The Lord, so to speak, can favor no one. All people are judged by the law of the Uni-Godhead. Which is to say, they are judged by whatever judgement they put upon people and property.

All hangs in the balance! Communists cannot occupy territories until the social conditions in nations demand

civil social action from the oppressed people. The oppression of the people is caused from old world economics that can't maintain progress for all people. When the communists begin to truly communalize the territories they occupy, then all arguments and hard feelings will end against Communists. Everyone will have to admit they are doing what the Lord commanded of his elect.

Now the vibrations of the planet have risen to the degree that detente has appeared and great nations like the Soviet Union are beginning to wonder if it's necessary to have any kind of punitive system or punitive laws at all. As Uni-Godhead tells, Its law is being written in the 'inward parts' of many people. They are beginning to understand Its law of cause and effect, karma-retribution (retroaction), thru which It governs all creative life.

There's no real reason why all the people of this planet cannot be of the Kingdom of God space organization, have wings and fly back into eternity. I say 'space organization' because the Kingdom of God is not grounded in matter. It is of fluent energy, and matter follows the natural laws of energy. But the science of this planet is yet in matter and can't heal any of the problems conflicting people with matter consciousness. There is no war, crime, disease, poverty, enemy, etc. There are no negative effects at all, as material scientists talk about them or write about them.

See Prophetess Mary Baker Eddy's Science and Health and Prophet Marx's Dialectical Gospel of Materialism and then read the synthesis of it all in these writings. All the problems that conflict this world humanity are simply in the way goods and services are distributed to the people. Marx, Engels, Debbs, DeLeon, Lenin and others have all championed the right use of material things. "The multitudes of them that believed were of one heart and of one soul; neither said any of them that ought of the things which he possessed was his own; but they had all things common." That is the ideal that Jesus taught. He and many others of the past and present were and are the prophets of the Uni-Godhead for the establishing of Its Kingdom now! There's only one thing for all open-minded people to discuss now and it is the ways and means of total world sharing. Talk about it and then go ahead and begin to set up the plan whereby all things are shared. The only things we the workers of the world will keep going are food, clothing, shelter, care, recreation, transportation, communication and energies. We will let all else fall out of the picture.

Eulogies and rhetoric make room only for extravagant posturing on issues, producing only a surface impression of militancy. The spiritual position is one of affirming the ending of capitalistic effects now. To affirm this now is not to overthrow those who are called capitalists by the use of

force and violence. There is nothing to overthrow, there is only right-use-ness to be applied to all material things. To overthrow the remains of capitalism by force and violence means the removing of people, who possess property for their own secular advantages, from the property they are possessing. But there's a much better way of removing the cyborg beast of capitalism than fighting with those who are mentally subjugated to it, and it is to carry out a World Wide Passive Resistance Movement and World Wide Buyers' Strike. Thru positive action this peacefully accomplishes the noble purpose of ending the wheeling and dealing of the moneychangers and building the true Christ Communist world right now.

In the way the socialists emotionally talk about all the lives lost to secure the Communist Movement in Russia, they miss the point of what the Uni-Christ Reformation is and why the Uni-Godhead told of great sacrifices of Israel people. As long as no one really dies, and those who are needed here come back to carry on the world transformation, then why should anyone think that people are only bodies and the blood spilled was a personal sacrifice? It was and is a sacrifice to the Universal Creative Intelligence, because It could not make people understand that manufacturing more guns, bullets, bombs, missiles, etc., will solve no problems and only kill more people.

What is the logical and reasonable solution to their problems? It would be to stop making guns, bullets, bombs and missiles, and for all soldiers to unite with the One Idea and become Universal Soldiers. If righteous people don't do these things, then how can they expect the unrighteous people to stop their armaments race? The Uni-Godhead has already put the power in the hands of the Soviets. So real detente can be the order of the day for full disarmament.

Will the communists at last have to destroy capitalism in war? The fact that they have all gone on in the nuclear race shows this feeling. But there is no capitalism, as they see it, in materiality to destroy. The satanic power that animates the people who practice usury is in the planet's aura and has been recorded there collectively by all people. The question is how do you neutralize the satanic power, or luciferic energy, in the planet's aura that is causing war, crime, disease and poverty and all negative effects?

If a boil on the body erupts, it is to let impurities out of the body. You may remove the sore by superficial means, but another boil will come as long as the body has waste in it that must be eliminated. So it is with sun-spots, cancer in the body, eruptions of wars, etc., which are coming forth from the earth's akashic records. What has been happening here since 1914 shows that what's recorded in the planet's auric time track - which in turn animates everyone according to their karmic experiences - is really very much in error. But

it can and will be changed.

As the vibrations rise here, they are forcing the separation of the chaff from the wheat or the harvesters, who at last inherit the planet simply because they are the only ones who know how to live on it and transform it into its perfect order. Earth people's compulsive repetition of errors which they recall from their past akashic records will have to be sidetracked. This can only be done with a plan that is totally different from any present formalities.

If the World Communist Movement (the World People of Israel) go on with the present status quo regalia, hoping to be led into the promised land by and by, they will go right on thru a terrible tribulation period - the "last war for the world." Then the survivors will have to pick themselves up out of the ruins and begin to build the very kingdom I'm telling how to accomplish now by just having more fun than has ever been had by a people.

A knowledgeable person will put only the things in his or her body that are of nature - no commercial foods. So it is with the things in your mind aura. Our eye must be single, meaning we must be one with all things, because all opposing things are relative and working together to synthesize into our New World Order.

The phenomenon of communism is that it doesn't know itself. It hasn't become ETI yet. It doesn't know that it has already won the higher honors of the Universe for the World People of Israel. In the unfolding of this kind of world drama, those who bring the most realistic changes are criticized the most and feared the most. But this is only because there is a part of each person that is yet unconscious to them, and which is to be awakened now. People in a dilemma are egged on, in spite of all losses, to be whole again. This happens thru the seed atoms in our very make-up, through which the Universe can turn us around and bring about the new order here.

It doesn't make any difference what name you call it or what the process is, whether you call it evolution, revolution, natural selection, spirit, Christ, God or whatever; that which is happening here delivers a harvest of the people into a New Age - enough of them so that this planet can be put to proper use and returned to the normal functioning of a planet. People are the real experiment in themselves. Let the turned-on people come forth in every nation and begin to build New Age pilot model cities in which the dream can be experienced by millions of people ready for such fun. Then we will have *knowing* people.

Abundant food, clothing, shelter, care, recreation, transportation, communications and utilities for everyone are created thru teamwork on the part of all people. They shall all be operated of, by and for the people, thru the world

people's industrial schools of creative experiences. Individually and collectively every person shall have all things at their fingertips, ready to be used when they are ready to use them. No one can go wrong in a world of absolute freedom, security and abundance for each person. The Universe is absolute and unchangeable except by Its own decree. When people declare absolutes, then no one can blame one another for their unhappiness. Every person must then grow along the lines of natural soul evolution.

What's called the human mind is actually the Universal Mind. The knowledge people acquire is experienced in the things they enjoy doing; and as you can see, in doing joyful things, time simply passes by. You realize that all people are subject to the mental seeds they have sown, and are reaping what they have sown. The judge reaps sitting on a dull bench. The lawyer reaps the dull job of pretending he serves justice. Both are reading their legal script, which doesn't serve justice or rehabilitation and in fact creates more negative effects. There is no crime! In every case it is cause and effect, karma-retribution, "like attracting like," people being persecuted for their righteousness. So forget about passing judgement on people and just help, love and lift them regardless of what they have done. If people can't function in society, put them in a supervised beautiful commune where they can learn to do all things for themselves.

You don't need guns or police and courts to serve justice or to have security. Society, thru its institutions, pampers its weaknesses; therefore it doesn't grow stronger along the path of righteousness. Finally it falls prey to people who, because their jobs are boring and they are dependent on them, become fascistic, which in turn keeps the artificial justice intact.

The true communist is building a New World which, when completed, will never have starving people or people in need of anything they can't build for one another and acquire together. If you see only the seeming defects of communist world changes and do not see the ultimate goals that inspired communists, then you will fear the further changes that must come and you may sell yourself short of being in the lot at the end of these days of growing tribulation.

At present it takes about twenty percent of the people on the planet to keep status quo records to try and control another twenty-five percent of the people, who are so spoiled by the ways of the world that they cannot get into anything. Not to mention another twenty percent who are into everything that's status quo and live by situations created out of the errors that government, science, education and religions are into.

The kind of world I'm projecting into being liberates all the clerical workers from paper work, as well as all workers

from every kind of superfluous job. The Uni-Godhead put this planet under money atonement in order to cause a structure to be built under which the people would experience enough of the hell that can be created out of their wrong use of materiality that they would eventually arrive at the right ways and means of spiritual living. And likewise, the people would create enough right use of materiality to gain the vision of what science and technology could do for them when money atonement was taken away.

Every person is a scientist in one way or another. Science begins in mind, and mind IS. And IT is Universal. All that we shall ever imagine is already imagined. People will have to begin to express the circle, the "We" in it, because the "I" will be gone. People will acclaim your good works when you are not seeking acclaim. People will respond to truth when there is only truth expressed. People will live together in full rewards when the rewards are in what they do. People will have free exchange of all commodities, materials and ideas when they cannot profit from possessing material things. The ability to possess anything is in the same illusion of justice and military might. The Uni-Godhead at this time comes down hard on the establishment because they are supposed to lead the people but they aren't, they're just playing silly games with the people's heads.

The illusion cannot stand beside reality. The reality is in people's collective spiritual power, where every person is for ONE IDEA: one for all and all for one. There is only ONE IDEA, and it is to be free to do the things that bring health and happiness to you and everyone else. The great IDEA encompasses all of the world society as one people, all having equal opportunities to express their talents. The IDEA isn't new and it isn't old, it isn't timely nor is it bold. It's just plain common horse sense. The IDEA doesn't need armies to fight for it, police to police it, judges to arbitrate it or legislators to legislate it. The ONE IDEA is the Uni-Christ idea of a true heaven on earth. Every civil official dreams of the day when his or her work will be completed. Every logical policeman and soldier dreams of the time when policing will be no more and wars will be no more. Their dreams are coming true!

Since the people cannot seek the end of life, because there is no ending of it, then all there is left to seek is that which was there in the beginning of this dispensation but could not be theirs until they could come back into the same kind of Uni-experiences they dropped out of. What is called evil had nothing to do with their dropping out and being sent into this kind of project to be restored. The negative effects of this project, described as evil acts, are only effects of the original cause of dematerialization from an eternal body. It happened in the material progress on planets in this solar

system and in a few other solar systems, but the cause wasn't from anything that anyone was aware of. The cause for planetary projects such as this one to be set up deals with a problem in the electrical circuitry of etheric bodies. The negative effects all people experience are only part of the healing of the greater problem, which earth people can heal now only by applying the EG's World Master Plan.

Things like disarming the whole world, getting rid of money, ridding the world of the penal system, fulfilling all the world religions and doing away with all national boundaries and national governments seem staggering to most people. But once they experience Uni-first causes, they see that building the New World Order just naturally leaves all negative effects behind.

It took many years to build Rome, but it fell in a day, so they say. It has taken many centuries for the entities being recovered here to get to the place where the greatest surprises ever would come to them. Nothing really falls, it just keeps changing until, by establishing the right kind of living experiences for all people, it changes into that which is unchangeable and then climbs in happiness forever. Who has known that the earthbound entities here are part of this special project, and even that which seems to have fallen behind is brought forth as the catalyst to bring a whole solar system into its next step ahead? Does the Universe have unusable byproducts? Even the satanic energy in the Van Allen Belt which rings this planet, created by all people out of their wrong use of mind energies, is the blasting powder that can take to the highest heights those who hook their wagon to a star.

Of course it could also dash them on the rocks, depending on the way their emotions actualize themselves. Emotions act according to Uni-karmic law, and to have karma under your control you must wait for the synthesis ideals to come into your aura and act only upon the ONE IDEA, which is absolute freedom, security and abundance for everyone. All the struggles here are in the playback of what has already been recorded by the people, which blocks off their memory of the far past. Obviously memory serves a purpose, because in making contact with space you've lived in before and people you've lived with before, you can recall those things of truth that can be applied to the here and now. But if you're not in the here and now, listening to the silent channel that is always ONE - one people, one planet, one Universe - then you'll be here, there and jumping all around in feelings and ideas, not being able to land in time to be around when it all climaxes into a great world celebration!

Earth people have race consciousness of the Alpha and Omega. In their nuclear weapons they can see their Omega, and in the Alpha they can only see where they became conscious of

self. As the Universe is from everlasting to everlasting - It didn't begin nor can it end - then earth people have a particular problem of coming back into such an eternal continuum. Suppose you fall out of a swing; what are you going to do, swing no more? You would pick yourself up and keep swinging until you learned not to fall out of the swing. You would keep trucking until you had hauled the loads of bad karma to the recycling plant, and then let the Universe edify your trips because only It can straighten out the mess earth people are in.

In these books of the EG you have all the ideas, knowledge and affirmations as to what you can do to become emancipated from boredom. More than anything else at this time, status quo life is just boredom! Don't depend any longer on the mortal thought coming into your head radio station from the planet's akashic records to give you the Spirit of Truth. First you must stop thinking and start believing in things that seem impossible, but are easier to accomplish than the drudgery of doing things the way they are done now.

Capitalism is negative, socialism is positive and true communism is the Synthesis. Socialism can militarily destroy those people who fight for capitalism, should Gog's Army initiate the "last war for the world." And from it the true Christ Communist ideal would come into being all over the world. To sum things up, let us bring to mind again this bit of highline information that the Uni-Godhead gives in the scriptures and synthesizes in the books of the Everlasting Gospel - that "all things are relative and are working together for the common good." This substantiates what philosopher Hegel was given to teach about the World Revolutionary Movement, that antithesis versus thesis evolves one upon the other into the Synthesis. It is obvious that on the earth plane there are right and left wings, and that they form duality opposites - neither of which can produce Christ Communism. The ways and means in the IDEA itself supersede all else.

Where are right-wingers in consciousness? They more identified with matter, or materiality, and afraid to let go of it, acting as if 'matter was all there was' and it would disappear if they went broke. Industries, of themselves, do not go broke, only the people who operate them go broke because they are engaged in getting for self and not building industries for the joy of the people. Left-wingers are more identified with social changes and socialism. To have this thesis, one must have an idea above the erring ways of the status quo world. The status quo refers to the way of life for the world up until the time the Christ force of the elect or enlightened ones rise and affirm the Christ way of life.

The World Revolutionary Movement is the Christ World Revolutionary Movement, and Christ means Universal

Consciousness. As enlightened people know now, Jesus should have been referred to as a Cosmic Adept with psychic powers. He was in part directed by the Universal Mind, but attributed his power to the Father God, which is the Solar Logos or sun of this solar system. Automatically and inadvertently, the Solar Logos computes for the entities on its planets the consequences of the use they are putting to mind energies imparted to them. Since the cybernetics of the consciousness earth people have been sending to the sun for rebalancing is in duality, then the prophecy which they wrote about the future of this planet could only come back to them in duality, as though a 'God of wrath' was giving the prophecy and the 'other power' was Antichrist, meaning force opposing God.

The idea of a separate good and evil is the illusion and the IDEA whose time has come and cannot be stopped is the reality. When they embrace the perfect IDEA, and they soon will, it's all for the blessing of everyone; so no one can put the IDEA down if they are open-minded. You've heard the expression about "being open-minded." What does it mean? It means being open to everything - not reacting to anything, but rather, synthesizing the ideas of every discussion by affirming the truth. This isn't hard to do when you know the Universe is perfect programming and all imperfection is simply programmed into the aura of the planet collectively by all the entities in bodies, who, as the Uni-Godhead tells, have all fallen short of Its glory - meaning they have not yet established the way of life that would come if the people live according to the way the Universe is operating thru Its natural laws.

STOP CLINGING TO OLD DOGMAS

In these channeled writings I continuously speak of usury money and how it is the main cause of the American dilemma. Money is so close to everyone and yet most people do not know what money is. They don't wonder why they do not produce all things together and share all of it with each other. They cling to the old dogma, either religiously or subconsciously, that human nature is sinful and people can only be saved at the time of judgement if they are in good standing with Jesus. They shot Jesus so full of holes with fairy tales that now he doesn't have enough converts to even fill up one corner of the heaven he prepared for them.

Jesus sends the Comforter, that's me, as it tells in St. John 14:15-17 and 26. The scriptural passage about the Comforter has been a mystery to Christians. He is a person who gives comfort to all people. He has no excuses for anything! His world is of the same perfection as the Uni's natural dynamics. He does not compromise with any group - make deals, keep secrets - he lays it on the line as it is. There are ways

that some people think are of the truth, but the ends thereof spell disaster for many people. Some people want more time to think it over, just in case the Everlasting Gospel and its World Master Plan aren't the real thing, but by taking thought of the thing they cannot add one cubit to it. The Uni is all-knowing, so then why are most people thinking, guessing and supposing and giving opinions in an all-knowing Universe that is no further away from them than the closest atoms? But they can't tune into the Universal Mind until they begin to give and receive and hold no part of themselves back.

To end your thinking that goes on and on but never arrives anywhere, what does the EG's World Master Plan teach and give? Can anyone find any passage in all the writing I have channeled from my ETI or Uni-Godhead connections in which I advocate any harm to anyone or plan any kind of an overt act in which people will suffer? Turn all the scriptural prophecy about the establishing of a Heaven on Earth around to see that no God is punishing people for their sins or even evil acts. Any real student and "doer" of the scriptures does not see an anthropomorphic God waiting until judgement day to separate the chaff from the wheat, but knows that, whatever the problems are on this planet, the Uni-Godhead already began to heal them when It first sent ETI space beings here to set this dispensation up. And for a long time the masses of people will not be able to discern the off-color things from the right-on spectrum of light. The world calls this discerning the false from the true; but, inasmuch as all things derive from the Universe, then part of It isn't false and part of It true. Those things which are right and left of center (antithesis versus thesis) will come forth now in the synthesis to give comfort to all people. Common sense tells everyone that there should be a sharing of all things, and then everyone's material needs would be met and they could begin to accomplish higher spiritual goals.

What's bugging people is just the past they can't let go of. There's really nothing in the past worth remembering, except when this dispensation began - and when you can start from there, you'll realize this preliminary period has just been a nightmare that is at last coming to an end. A patient can be healed, yet he goes on thinking he's sick because he worships sickness more than his health. Sickness in this world gives people certain services they wouldn't have if they had vitality. Of course, if they had vitality, which comes thru enacting positive ideas, then they would be contributing to themselves and humanity and all their needs would be fulfilled in return.

What I'm telling you about usury money (money under interest-bearing notes and taxation without representation in the people's commerce) is most important, because it is the big hang-up in the United States that holds back the whole

nation at this time. US citizens cannot cross this bridge without disrupting the whole economy and beginning anew on a clean slate. The Uni-Godhead, through its ETI space beings, will not let the US tribe of Joseph go into socialism, but will cause them to build true communism. We don't need socialism! We need real communism.

There is no way the US citizens, by using intelligence, can argue about things in the Soviet Union, without looking into their own affairs to see that they have held communism back from establishing the higher ideals of Christ Communism. In the WWII Armageddon for example, they did not rise in righteousness to correct the things that were wrong at that time. And now all the errors are really beginning to stand out like a sore thumb. The Americans say: "Oh, we can't correct our own faults until we win the world back." The Revolutionaries say: "We can't do it without overthrowing the old establishment." But even if they did have a bloody socialist revolution, where would they be? They might then enter into the millennium, a thousand years of controlled peace with the Soviet Union and Red China, but out of it wouldn't come the Kingdom of God for another thousand years. They would not rid the world of money or the penal and military systems. They would greatly modify things and everyone would have a higher standard of materiality, but the same old hang-ups would linger on. The scriptures wouldn't be fulfilled so the religions would linger on. The nations and their governments and boundaries would linger on. More red tape and paper! The people of earth would go on under their old time track, but near the end of the thousand years they would know that something was radically missing.

The thing that would be missing would be the rest of the Universe. The Uni-Godhead's space angels, or extraterrestrial beings, could not possibly unite earth people with the rest of the Universe they know until the persons who lead the world are all-knowing and could communicate with them on a realistic basis. Suppose earth scientists did receive communications with beings from other star clusters or quasars (ethereal cities), as they are trying to do, and space people gave them a cosmic channeling similar to this, which of course is all they could do. At least then earth scientists would begin to listen to me!

Earth people will never meet up with extraterrestrials under the paranoid illusion of space beings conquering and then ruling them. Space beings have been able to plan the structure all along through which earth people would pass from a preliminary period - which is the one they are in now - into the autonomous, atomic state of natural Uni-government. Space beings can send etheric beings, who are invisible to earth people, to be among them in governmental chambers where decisions are made. They can influence decisions so that the

greater plan is always being worked on. This is the meaning of Gog's Armies having hooks put in their jaws so they could not win.

Ezekiel 38:4 tells of this. Gog's Army in the WWII Armageddon was Nazi Fascism, and it was the USSR mountain of Israel they would move up against and were turned back from. Higher space beings do not make decisions on the basis of necessarily preventing wars or saving lives or making it easy for the people here in superfluous ways. They know only the autonomous state of the Universe that is all-knowing and is of absolute freedom, security and abundance for everyone. Wars, criminal acts, mental and physical illnesses and poverty are all created by the sum total of the people. The soul evolution of the people divides them into antithesis versus thesis, because, as people open up consciously to higher vibrations, they pass from solar plexus alpha energies into the opening of heart chakra beta rays. And as people persevere righteous causes for all humanity, experiencing how to apply reasoning and logic toward that which is right for everyone, they begin to open up in head chakras to the synthesis of gamma rays.

In other words, solar plexus, heart and head chakras correspond with alpha, beta and gamma rays, constituting the three-in-one triune of the Uni-Godhead's balanced energies, which are predominant in the electromagnetic field outside the earth's aura. The balanced energies of the cosmos have not been able to penetrate into the earth's aura, except into its outer ring of white light, because in order for them to flow in, there must be channels on the planet to attract them. In the pouring out of the high PSI synthesis energies at this time, space beings are able to blast these energies into the earth's aura, which, in turn, begins to force the negated energies in the earth's aura back through the people according to their karma (the mental seeds and acts they have sown). This forces them to flip out in foolish rioting, revolution, war and disease. Warring, crime and poverty are just aspects of the same thing, and so are earthquakes, drought, freak accidents and severe storms.

In wars, the workers create the weapons. They send their sons and even daughters to fight their battles. But now technology has brought the wars from battlefields into the cities and the civilian population feels the sting of war as well as the soldiers. The Uni-Godhead tells that the sons and daughters will turn against their parents, and this is logical because the parents sacrifice their children in war for the mortgaged house they live in and the car they drive. The parents for the most part are still superstitious. At one time, not too long ago, they thought the world was flat and that the sun and stars rotated around the earth. Now many think that the earth is still the only inhabited planet.

We read in history of the bad time the Catholic hierarchy

gave Copernicus and Galileo because they were giving Uni-truth to the people, which interfered with the old traditions and superstitions of the church. A great reformation began in Europe that brought the Protestant era, but as we see, they did not lead the world into Christ ways. Then finally there rose communism, and, although each advance of the world people has brought them closer to this time in which the total crossing over from the old world into the New World will come, they are still sadly lacking in the know how of carrying out a real passive resistance movement that will end all struggles, bring about the changes that will put them back onto the Uni's main line, and join the people of earth with the beings of other planets.

Can you see that fear blocks the people from letting go of the old to join the new? The fear is more of loss of ego than anything else. Not many people as yet can even see the choices: to either stay behind or go on ahead. Actually they are not choices in the ultimate sense, but before the synthesis can come in a person, they must choose to act in spiritual ways - not 'religious' but spiritual ways - and then they can see there was only the right way in the first place.

Religious hierarchies in their eulogies and pious ways do not attract the synthesis energies and apply them, nor do statesmen and stateswomen, who are bound in the red tape of trying to legislate world commerce in which money or kinds of bartering are used. The big problem is to get earth people to talk about the real goals they are to reach and the contradictions in their present way of life, which is collectively created by them. The field is relative. All groups of people on the planet move together.

The communists must realize they are also helping to create the conflicts they've had to enter into in order to defend what they have gained. They help create the conflicts because of their lack of Uni-linguistics which, when spoken, could give people enlightenment as to what the end goals of Christ Communism are: the same goals as those given in the scriptures that create a Heaven on Earth.

For example, prophet Marx used the synthesis idea of philosopher Hegel in respect to the World Revolutionary Movement, which defines antithesis versus thesis as the opposites that evolve one upon the other into the true communist synthesis. So the communists should know that in the whole world there are not nations to contend with; only people of predominantly fascistic, solar plexus vibrations, and those who are rising in vibrations and consciousness to add to the New Age thesis. Every communist, Jew, catholic and protestant should be in the Uni-Christ synthesis and should keep throwing out stimulating yin and yang thought to provoke discussion, and then in the discussion give the synthesis of the way things evolve and should be.

There isn't a being called Satan, but there sure are a lot of satanic energies recorded and built up in this planet's aura, and they are playing back and taking many people whose shattered emotions are flipping them out into all kinds of wrong things. But even this is relative. No person can say he or she is good and will be resurrected into life, or that he or she is bad and is condemned. It's easy to see how this illusion of God and 'something else' comes into being. Notice that I am given to speak of Uni-Godhead, which teaches that "all things are working together for the good unto those who love the Uni-Godhead and are called according to Its purposes." This exact language is given so as not to be misleading. Much confusion has been perpetrated on the people with the use of the man-God idea. So let us speak of the Universal Creative Intelligence, in accordance with Its true nature as Macrocosm, and of ourselves as microcosms.

ETI has held the karma, or luciferic energies, down to a level that has kept a great land cataclysm from happening here. They can't take it all away though, because then the remaining entities here yet to be healed would have no resistance to force them into the proper ways of living. As the Uni-Godhead tells, "all things are working together for good unto those who love Its life, nature and spirit with all their heart and soul and are called according to Its purpose." Which is of course, not to play with material tinker toys, but to build a heaven on earth. Acts 4:32-35 tells Christians where to begin. All karma is good if you can receive it as such. The playback of negative karma sounding in silent thought, coming out of you in harsh words and causing pain is only telling you what you must do to correct your errors against the Universe's ways and means. It's what comes out of your mouth in the wrong use of words that defiles you, and not what comes into your head radio set. Learn to tune out the status quo dogma by living the Christ life and speaking in the Synthesis on behalf of all people.

Just know that when you eat properly, love thru serving properly, have proper relaxation, sexual life and first cause creative experiences, then you're on the road to healing, and also on the road back into the Kingdom of God to be united once again with the great Universal Family.

No one in the Universe claims to know how or when the Universe was created, made, evolved or was begun. Every novice seeking psychic clairvoyancy seeks to know what God knows. They ask the 64 million dollar questions and they only get the 64 dollar answers, usually from entities in the astral or etheric heavens of this planet. But the idea of receiving a thought in your head that isn't your own usual thought, or of the world, mesmerizes persons with the illusion that they themselves are the Cosmic Messiah.

In these times of rising vibrations, there are many people

walking around receiving outside thought, who are taking on vibrations of Messiah-ships. The grandeur of being an important elected master on the earth of their hierarchy outside of the planet gives one a feeling of extra power and importance. Hitler and those who gathered around him had psychic powers that came from astral entities who, of course, thought they had the plan for all humanity. Hitler and his subordinates were in a space all their own, and no one could crack their ideas until they had brought the whole planet through a karmic cleansing. All this was just a karmic play-out of past conditioning from former incarnations. The great courts of law, judges, police, etc., turned into a nightmare in Germany, and the military destroyed many people and ravaged cities. They were just the example for other Gentile nations under usury money.

The Nazis' inner circle couldn't bring their sojourns in heavenly abodes into material reality to demonstrate right-use-ness of materiality because at that time the planetary vibrations were very low. Many people are surfacing now as Uni-Godhead's high PSI energies are being poured out on all flesh. They see the relativity of it, and this Everlasting Gospel shows them that only a great passive resistance movement of spiritual detente can change the world into what it ought to be. The Hitler mediums could play the same telepathic parts on the earth plane as those who led them from the astral plane. Believe it or not, a verse in Rev. 2:13 sheds light on Hitler. John's message to the church at Pergamos is to the Vatican. The Father God, or Solar Logos, tells them it knows their works and where they dwell, and even where Satan's seat is. And it tells them to: "hold fast my name, and not deny my faith, even in those days wherein Antipas [Hitler] was my faithful 'martyr, who was slain among you, where Satan' dwelleth." Hitler was just a lord of karma sent to plow the fields so that the good seed could be planted and the harvest reaped for all humanity in Michael's stand with the Holy People.

In knowing that there is no Satan as a person but that there are simply satanic energies in the earth's aura, then one can see that this passage refers to the people who are under heavy karma and caught in exorcisms. They could only have gotten that way by their social misuse here, in which people had wrongly judged one another and caused unnecessary hardships for each other. The Hitler movement was the culmination of tormented souls who thought they had psychic powers and knowledge to put the whole world right again. Naturally this would have to happen before that part of society who thought they had all the answers would begin to face world problems realistically, which, of course, they still aren't doing. But they are improving.

Hitler was Antipas, and the meaning of him being a

faithful martyr is that he was a terminal around which the world people of Israel would be led back through their karma. And Israel people would make great gains in science and technology as they were spurred on to keep the military balance, out of which in WWII, the Communists wound up with all of Eastern Europe. All that happened to the Allied and Axis powers was already recorded in the earth's akashic records. But the victory that IS REAL people won was of their extended righteousness. Because the world people had erroneous beliefs about their militarism and judicial penal system, then these would come into play and be tried on a grand scale. The war should have proven to everyone that militarism, together with the judicial penal system was really a fantasy in bloom. The world people should have come together then and disarmed the whole world and done away with the old penal system.

But as we see, there were still plenty of luciferic energies left in the planet's aura and thanatos characters to bowl people over and carry them on to further daily sacrifice in Korea and Vietnam. The Uni-Godhead had told them that "if they lived by the sword [guns and bullets], they would die by it." They did live by guns and bullets and they did die by them. This was all the playback of the mental seeds earth people had collectively sown. The forces of antithesis and thesis, or right and left wingers, reaped what they had sown. Christ Communism was Gog's target and the Christ Communists turned back the demagogues, or Gog's Armies, just as Eze. 38:4 told them they would. Isn't it obvious that this civilization is coming out of a period of misunderstanding and into a period of understanding? Or that it was in a predicament and is coming out of it backwards to turn itself around and go forward?

Once you really know cosmology, you can figure out the meaning of all things. And you are shown the proper path the world people will follow, and must follow, because there is no path other than the one that has been unfolding for all humanity, which finally reaches yin and yang balance again and brings the Synthesis to all people. Only those who must cause their own ruin will counteract truth by doing things that are totally indifferent to the real social standards that serve humanity first, and that serve others as we would want to be served - remember the Golden Rule? This is accomplished not by any kind of rituals, exercises, priest or political crafts, but only thru a plan for all humanity such as that which I have given in the very timely IDEA of a "World Wide Buyers' Strike." I must give you the truth about all things and see if you can digest it, or eat it up, as I have. Sometimes the truth, on such a special project planet as this, makes your belly bitter, to have to experience and carry such corrosive energies. But finally, once the truth is digested, it will come out of your mouth as sweet as honey. Which means that

once you understand the whole vision of how the New Age is put together thru the World Master Plan, then the words you speak will be of the Synthesis and will inspire all who hear the great IDEA into the kind of truth in action that blesses all people.

Here's more good cosmology. Just know that all planets evolve as hollow vessels and had original civilizations that evolved inside them. Most of them are populated now, on the interior surface, with beings in eternal bodies. Travel among the planets is no problem because beings in eternal bodies can teleport and they can also transport their whole living environment with them - entire city-like space ships that operate directly off of the high energies of the electromagnetic field flowing between stars. The way things on this planet are now, no one can get connected into the raw energies of the cosmos to gain knowledge from them. This is an advanced ETI project, where high space technology changes the outside of planets so life can exist outside as well as inside. A different kind of body was needed too - and they are the humanoid bodies that we occupy. All material knowledge comes from auras, as people experience working with matter, or material things, and record their experiences in the atoms of their molecular structure - which plays back to them as recall. You can see that Mind exists in atoms and is Universal in every way.

ETI space beings can relay these things to me that I write down from space ships because they can broadcast on the wavelengths of telepathy, in which there is no time delay. All I need do is to be able to balance with the yin and yang poles of this planet's auric akashic records, the playback of which reflects all the bizarre trips going on here. The synthesis energies that ETI beings send to me cognite me into the planet's akashic records to see and hear what really took place in history around important events. And they lead me in these writings to give the synthesis of past events as they apply to the here and now. It's sort of like I'm not for or against any particular thing... only for that which is right on for everyone. I can take the important ideas everyone has expressed in words or in writing, see where they are coming from, and then - most important of all - put them back into the big jigsaw puzzle (the Uni-helix) so they fit into this World Master Plan.

No one will deny that Hitler took a lot of people on a ride. The question all people should analyze for themselves is why at that time the people, except those of the Christ Communist Nation of Israel, went along on the ride? Was it because they were relative to the mote they saw in their brother's eye? With all their Christian theosophy, they surely should have been able to affirm the truth in ways that make the truth live. The Vatican knew what was happening in Germany

in WWII, but all they could do in their static position was just bear it and pass on through. That is, the Father God couldn't give them the synthesis of it all so that the world people would have some guidelines to follow instead of being possessed to follow the path of least resistance.

The wonderful synthesis truths of these writings do not come from Solar Logos computations. They are from high synthesized etherial realms of great civilizations in outer space, who are on direct drive with the Universal Mind sounding in their heads and directing the purposes of their technology. The recent advancements made in parapsychology and physics in the US and USSR space projects will dovetail into ETI space technology. High US and USSR ETI scientists have the tendency to think of themselves as inferior. This is because they think of themselves as a body instead of knowing their being as the eternal entity in their body. Bodies are, of course, just space suits, so to speak, that entities operate in on the planet. The high ETI-PSI scientists on the earth plane have already been redeemed from this planet by ETI space beings and are part of the "144,000" telepathic team who have incarnated here on the planet to redeem earth people. Rev. 14:1-6 explains this in allegorical terms.

The Uni-Godhead gives cybernetic reports to Its planetary people in the synthesis ideals, but from a neutral position. This means that Its highly realistic prophecy is given according to the tabs It gets from Its Solar Logos, with respect to the planets' auras which are being returned to normal. And it is what the people do on respective planets in the omnipresence of catastrophe that makes the difference between going the extra mile now or going down on a karmic ride, to pick themselves up later to do the love services they should do right now.

AFFIRM THE TRUTH

Start to affirm the Truth, especially the parts of the greater truth realities that provide abundant natural food, clothing, shelter, care, recreation, transportation, communications and utilities for all people on one high standard. These things should be shared by everyone and everyone should share in the producing of them. Everyone will share when the New Age system is set up by the world people.

We should stop complaining about how things have been up until now. The majority of the working class could unite together and, in less time than you'd imagine, it could be demonstrated to everyone what real people's spiritual power is. Industries can't operate without workers, and workers don't have to lose pay when the majority of the workers strike. It is written in the US Constitution-Bill of Rights that the appointed government shall rule up until the time

that the people show they can be self-ruled. The people can demonstrate self-rule simply by uniting to completely end the old status quo world and bring about the kind of world envisioned in the New Covenant-World Bill of Rights.

The time has come now to hold all natural resources and industries common all over the world. The class of people who own the means of production now cannot go on owning them, because they cannot operate them without workers. We keep the necessary services and supplies going while we carry out our fantastic World Wide Buyers' Strike. In it, we're not striking for more pay, more benefits or better working conditions, we're striking to end the old world completely and begin over again, applying all the truth and knowledge we've gained thru the ways that common sense teaches us when we are doing things properly. The old world is run on fear and superstitions; fear of prison, fear of sickness and unemployment, fear of having to be a soldier who kills; superstitions about flying saucers, superstitions about the secret plans of the military, superstitions about life, the Universe and Its nature.

We must dispel all fear and superstition and begin to live by the truth. When people don't have the truth to act upon, they act without intuitive knowledge, and this is what superstition is. Seek the real reason why all people don't have the real attributes of life abundantly and freely. Discard all the reasons coming into your head that negate the Christ Idea, and just hang onto One idea. The One idea is that you are the government of, by and for the people, and your rights were given to you by Nature's God in the Bill of Rights. And now you have the New Covenant that supersedes all else. Affirm all things that are a part of your daily needs by setting up the right ways and means for providing all basic needs for all people.

To believe that a people would let individuals own their means of living and individually profit from them at the expense of other people is really about as far away from fair play or reality as one can get. So now, ask yourself (same as asking God) if you can have all your daily needs fulfilled. The answer will be a simple yes - the Universe's answer. Now you come to the how, and the Universe's answer to you is to affirm the truth now. When you do this you are hooked, so to speak, because you are facing your God-self, as well as all those who would misuse truth, and recognizing you must be true to your known self, that you not be false to anyone. In the asking, you know your prayers are answered before you asked them, because the Universe has already supplied all good things for everyone. Then on the affirmation you give, that all is yours to share with everyone else, something fantastic takes place. It is that you are so filled with radiant spiritual power that you want to tell everyone about it. You want to share it with them, or have them experience the free-

wheeling energies of completed mental circuits that run through the maze of it all, between you and the Universal Mind. You are free, and not because men set you free or gave you anything that was not already yours. You are free because you have the truth to act upon; and you can clearly see what you will receive in return by being in the center of what's happening all over the world, as the Kingdom of God rolls in like a steam roller with all the people who get with the Uni-Godhead's world revolution to establish Its order as promised.

Just as Jesus showed his indignation of the hypocrites when he drove the money-changers out of the temple, so are we indignant of the hypocritical ways some people are acting at this time, when all flesh could be lost on this planet if it were not for the fact that the Uni-Godhead's space angels have all things in hand here, as far as the saving of the planet and the entities who rally with this greatest of all causes. When anyone resists these changes given in the EG's World Master Plan, they are resisting the Uni-Godhead and Israel people, and therefore they stand in judgement. Not from an arbitrary man-God, but they shall be judged automatically by whatever judgement they place upon people or property. The New Law says to "help, love and lift every person regardless of what they have done." Just know that both parties in a so-called crime, the accused and the accusers, whether accused by individuals or by the state or federal government, are parties to the crime. Man's laws and governments are framed in the illusion of separate good and evil, and the truth is that if we are to find out what causes evil, or negative effects, then we go to what we call good and find what is missing there that is causing the negative effects. This leads us right back to wrong economics and wrong social environment. All along, most people have been divided into sides by governments, and not until the World Nation of Israel came in Russia was there a government that was centered in one idea - "the IDEA whose time has come and can not be stopped."

You will begin to agree with me that a World Wide Buyers' Strike is the only way for the US citizens to fulfill the Christ Mission now without going on through the last part of the Battle of Armageddon - "The Last War for the World."

There's no way to dehypnotize those who are now mentally subjugated to materialism and are in lower vibrations to the degree that they are automatically animated by fear and wrong desires, except for enough people to demonstrate, to those who own businesses, industries and institutions, that their profit-making businesses will do them no good unless they have workers to operate them, and demonstrate that the workers will not starve or be repossessed by the establishment's law while carrying out our World Wide Buyers' Strike.

There's an old saying that possession is nine points of the law. As individuals, under man's laws, money-changers can

repossess property when people can't make payments; but when even twenty percent of the workers strike in any area of capitalism and stop making payments, then the old establishment will have a very difficult time in maintaining their old status quo ways and means. Why do they try to maintain it in the first place? Only to cause the people to try and take it away from them! At this time the old establishment would like nothing better than a fight with the revolutionary people. It would give them the opportunity to reinforce their dying economy and police state. But they will not get a fight out of us. And they cannot divide us to resist each other, thus causing the big daddy state to be made the hero of more artificial peace.

CYBORGETRY MUST CREATE WARS

All the wars since 1914 have been caused by the usury economy of cyborg capitalism, which goes up and down and spills all over the place with torment for the masses of people. It must create war to try to keep itself going, but it cannot keep itself going because spiritual progress has already left it behind. It is a cyborg beast, so of itself it does no harm. But the people who are caught up in its satanic energies do. In the greater sense, however, there are no capitalists. There are only people mentally subjugated to the retribution of the Uni's natural system of cause and effect that dictates back to them what they have sown in mental seeds. So, they cannot reason what to do. Their perverted emotions cause them to be animated by the playback of their karma. There are ways that people think are right and seem right to mortal mind, but the ends thereof spell disaster for many people.

To understand the kind of cyborgetry the Scriptures speak of in allegories such as Gog, the dragon, beasts and Satan, one needs a certain amount of understanding of computer electronics. Knowledge has increased to the degree where we can begin to fathom how mental thought force operates through the space and matter atoms we are surrounded by. So it is very important that we understand the linguistics of the Universal Mind, and see what the confusion is and why the Father God idea fails to give us the overall truth. In whatever the demagogues do, they have their way of getting and preserving their kind of money game they all have their marbles in. Capitalism and communism can never live in the same world together - one is effects and the other a cause. No one really destroys capitalism, it just short-circuits itself out like an electric circuit when its wires get crossed. They have no real incentives for first cause service; the vibes of their payday mill are low and they are not being replenished from higher consciousness because they do not elevate consciousness from

the kind of games they play. When people are doing what they enjoy, rather than being in the run-of-the-mill, payday trip, they increase their energies because they are creating for a purpose. A good eighty percent of the people working under cyborg capitalism are doing jobs that would not be needed in a planned economy that is producing for the good of all the people. Anyway, you know the world you live in now is all wrong. It's all a big farce people have been playing out for fear the bogeyman will get them if they don't toe the status quo line.

In every dispute between dual forces, one is negative and the other is positive. Capitalism is antithesis to the socialist thesis. Capitalism is put on the defensive because of socialism's collective economy, in which the industries, instead of being owned by private parties who produce for their own secular profits, are held common by the workers, who produce essential goods and services on a sharing basis.

What socialism is showing is that when natural resources and industries are not owned by private parties but are owned and operated collectively by the workers themselves - using money only as a token that represents each person's amount of giving to the common good of all - then natural progress begins to take place, which puts a people on the road to fulfilling the Christ Mission. The Christ Mission is a Heaven on Earth as reflected in the Lord's Prayer.

UNI-CHRIST CONSCIOUSNESS

In respect to the Lord (a figure of speech) there is a great mass of people who are not affiliated with any denominational church, but believe in the revolutionary Jesus, an initiate of the Cosmic Order of things whose purpose, as his prayer reflects, was to build the Cosmic Order here on this planet. Most of the people who are literate in the inspired writings of the world believe in a revolutionary Jesus, but not the Christ Jesus of the orthodox churches. Christ is Uni-Consciousness and Jesus had this. Now the Comforter has come in me and I am to write what the Uni-Godhead channels thru me about all things, including the purpose of Jesus and others who were with him. Jesus and the other twelve were sent to set up the stage for what's happening now. Without the Scriptures there would be no knowledge of a coming kingdom that ends all the suffering on this planet.

In this time when iniquities have an end, the science and technology is here that, if used properly, could raise the standards of living for everyone, so that all people could have proper food, clothing, shelter, care, recreation, transportation, communications, etc. It is not happening because the old-world programming in the planet's time track

carries the people right on in their old ways. They cannot experience new things because most leaders, not only in the churches and temples but in every department, are still filled with the same old programmed do's and don'ts.

The Bible will become a snare for those of religious hierarchies who jumped on the Jesus bandwagon, so to speak, and turned him into the only begotten son of his father up in heaven, who supposedly, with his son Jesus, runs the whole Universe. To believe that this soul-saving contest has endured right down to this time! What a fantasy in bloom that the churches and temples have not come forth with the everyday Jesus who walked upon the earth trying to do with people exactly what is taught in Acts 4:32-35! I tell you the real church of the Uni-Godhead rose out of the people with the rise of world communism.

The Father-God part of the Bible was put into the Scriptures by the denominational churches' own religious hierarchy, which if anything, has turned Jesus into their own commercial exploit. People can be exploited by false religious doctrine as well as with money and materiality used in the wrong way.

So the Bible is not entirely the Truth, and the modern denominational churches of Christianity follow a false doctrine that orients them to believe in a man-god in their image. Could it be that he is nothing more than their own sub-consciousness, which they cannot connect with the Universe's reality that should be happening in their heads?

Why do I go to such pains to warn the orthodox Jews and Church Christians of what's coming down? Because they are needed to help put into effect a real World Wide Passive Resistance Movement that will counteract the fulfilling of the last part of the prophecy in Ezekiel 39:1-16. The Father-God idea caused people to believe they are dealing with an arbitrary God, and that the Kingdom of God is God's business and he will bring it about in his own way. Or, "We should just go along and believe that Jesus will come and everything will be all right for the true believers in him."

But now we shall see the temple Jews and Church Christians organizing their congregations in the ways the Godhead has given in the Scriptures. They shall come out of this old dying world order in mind as the Scriptures tell them to. And they will hit the "powers that be" with such a heavy blow by serving in the truth that the people everywhere will listen and the churches will fill up with real revolutionary people ready and willing to put into action the kind of World Wide Buyers Strike that will literally stop capitalism.

The churches can become a dynamic force for teaching the proper ways and means of bringing about these great changes. They shall inspire the world people to end all payments and cancel all debts in one blow and convince the owners of

industries and politicians that they are not going anywhere without the people behind them. There is no point in the workers working another day producing most of the things they are now, which soon will end up in the junk pile because they cannot be used in the new kind of world we are going to build. Righteousness will put everyone, rich and poor, in the same barrel. The rich will see that the organized strikes can end the exploitation of the people; and the workers will not suffer any real loss, nor will the rich people.

The World Communists, who have applied the positive teachings of the Scriptures which teach and do not coerce or influence people through fear of judgement, are accomplishing the Uni-Christ Mission, because they follow the cosmological truth in regard to the sharing of material things. But the people under cyborg capitalism - which is the dragon and beast in Revelations and the Gog and Magog of Ezekiel, chapters 38 and 39 - are yet hung up in materiality simply because their money is usury money (money under interest-bearing notes and taxation) and they allow the private owning of property (natural resources and industries).

The whole conflict between capitalism and socialism is simply in their ways of distributing goods and services. The nations of the Socialist Bloc have risen into a position of economic detente where they can deal collectively with outstanding world problems; the people under capitalism can't. Their government cannot move out in front without curtailing "business as usual." The main thing people under capitalism must understand is that capitalism and socialism are in no way compatible - that in the ways the Uni-energies are handling the world situation, capitalism must and will fall out altogether, and socialism must go into true Christ Communism and bring the whole world into it.

In the Everlasting Gospel's "World Master Plan," I give the people under capitalism the way to rise into the "world destiny movement," without going through the last part of the Battle of Armageddon which is designed by nature, shall we say, to uproot and cast out capitalism all over the planet. This happens during the 1290 days of Michael's stand with the Cosmopolitan World People, in which the men and women of the Adamen openly align themselves with the Uni-Christ Mission - the World Communist Movement.

To reflect to past history, men like Paine, Franklin, Jefferson, Washington, Lincoln, Roosevelt, Truman and others were communists. They were not necessarily communists in name, but in their acts. Consider that communism itself is evolving into its purest ideas, and the verses in Acts 4:32-35 are telling the Church Christians where they must begin now if they are to enter into the Uni-Christ Mission at this time and end the world conflict thru right action.

In these latter days, we have seen the ecumenical movement

of Church Christianity in their attempt to unite their demonstrations to be of one heart and soul. They haven't gotten to first base yet because they haven't faced the first issue of true Christians: which is to "give us our daily bread, forgive our debtors and no longer be led into temptation." These are all economic issues that a spiritual people could face realistically and overcome.

The Communist Party of Russia, where the World Nation of Israel was restored in 1917, did face the spiritual problems of the world realistically and brought a whole nation into the ideals of holding all things common. This is an example of how the Uni-Godhead (the Universal Mind of ETI - Extra Territorial Intelligence) is handling the lifting of earth people into its Kingdom. The way this manifests in consciousness is reflected in the three-in-one energies radiating from atoms. For practical explanation, this is the alpha, beta and gamma rays, or the three-in-one mental force that gives a person Uni-Christ Consciousness, or Cosmic Consciousness. No one can have this consciousness except those who enter into the doing of first cause love services for all humanity.

By no stretch of the imagination can the workers of the cyborg beast (capitalism) rise into the World Uni-Christ Movement unless they end their exploitation and the buying and selling of merchandise for secular profits. They can do this legally, because the Uni-Godhead, in giving the US Constitution-Bill of Rights, has already set up the ways and means through which the people of the United States of Israel can rise and become the government of, by and for the people. The present US government is in no way the true government of, by and for the people. It is the government of old protocol that is based upon owning private property and having secular money.

Take a good look at earth people - which is like taking a good look at yourself. The facts are that billions upon billions of planets in our Galactic neighborhood are populated by beings in eternal bodies who live in eternal Uni-happenings, in beautiful, creative, sharing experiences. They have space transportation between all of their planets, and have never had military regalia or a penal system, nor have they ever used money.

"Sure," you say, "but earth people don't know this. They haven't seen it, so therefore it isn't real to them." But I say to you, "What does radiant imagination reveal to you? Which is true: did life on other planets follow the same path as life here or are there a few planetary projects such as this one, set up by space beings, that are overcoming projects for spaced-out microcosms? The truth is that eternal entities, or microcosms, manifested eternal bodies at the same time the planets were formed, out of matter born in space. Almost all the planets, and their entities which are in eternal bodies,

went right on down the main highway and never got off of it.

It wasn't necessary for the Universe to evolve its entities who are on normal planets thru the kind of material progress that took place here. Entities, or microcosms, are miniature Universes designed to operate on natural laws already incorporated into the Universe. Microcosms are like electronic robots, and what they express is already created, or in Uni-imagining. The kind of progress that has been taking place here has been planned as a way of making up a time lapse in consciousness for microcosms (the real 'you' in a body) whose eternal bodies dematerialized, leaving them in space. The Universe, thru its ETI space beings or angels as they are called in the Scriptures, developed these kinds of bodies that can produce bodies thru themselves as a way of incarnating spaced-out microcosms here. This allowed them to make up for the lapse of consciousness they had taken on before their eternal bodies dematerialized. The kind of material progress taking place here parallels the Universal Continuum, but on a lower vibration. The plan is to lift earth entities now from the lower vibrations they are in, back into the Universal Continuum. This cannot be done unless earth entities will enter into creative love services for all humanity, so they can experience the higher free energies of the Uni-Continuum and record normal experience. In this way they become part of higher energies again. Once a Uni-Experience is recorded as your own, then you can recall it.

PATH TO TOTAL HEALING

The true communist idea is sound, but some people complain that the communists have just set up another system of exploitation themselves and their people are not really free. They don't ask why the communists have not been able to bring about the ideal state of what we imagine true communism to be. From the history of the Communist Revolution in Russia, we see that the communist leaders and the people in general were filled with good positive thought about their new adventure into a new kind of economic system in which the people would not work for owners of industries, but the workers would build a collective state in which no one was seeking individual profits.

Under socialism the people are rising into higher vibrations, and they have the greater understanding of what's happening than those who are yet under usury money and cannot have a normal experience because they are still caught up on a cyborg merry-go-round ride that always has bills' to pay. The people experimenting with socialism, which is advancing on towards full Uni-Christ Communism, have no bills to pay, as such. They could never have debts, because thru their revolution they took the power away from those who sought to

advance their standard of living thru seeking profits and the exploiting of people. The Communist Revolution sought to end the exploitation of people by people and bring about a communist era in which all people would join in the production of all the things they needed and share them all according to need.

The communists knew they would have problems with the old ruling class, but they did not know at the time that the allied nations of the world would bring the 1919-1921 War of Intervention against them, nor did they realize they would go thru the great WWII Armageddon. Now all this history is behind them and they survived it all and came out way ahead. And now their industries have advanced to the place where they are surpassing capitalism in every way.

The people of capitalism are yet under usury money, which is what capitalism is an effect of, and it all reflects back to the stone the builders rejected when the US was founded, recorded in St. Matt. 21:42-44. This prophecy tells that the Kingdom of God, which means the Kingdom of God mission, was taken from a people and given to a nation bringing forth the fruits thereof. It was the US tribe of Joseph that the Kingdom of God mission was taken from, and it is the USSR - sister Republic of US Isreal - that the Kingdom of God mission was given to. And the Lord says of this that it was his doing and it is marvelous in our eyes. Meaning it is marvelous what the Christian Communists, who rose as the church of the Uni-Godhead, are doing.

They suffered the great persecutions for the righteousness they expressed. The people under capitalism - rich and poor, commoners, generals and kings - had suffered so much from their own struggle to maintain that they had become conditioned by their struggle and all their ill feelings were launched upon the people who were actually alleviating their suffering.

The mere fact that a large land area was won on the planet, where a people of Isreal could begin to build a new kind of system, in itself intensified the economic struggles for the business people under capitalism to stabilize their stock market bonds and shares. For a long time after the communists had secured Russia, the world people of Israel did not know what had really happened there. The propaganda put out by the people who were set upon destroying the Communist Movement pictured them as the worst sort of evil the world had ever known. It took a long time for the truth to seep its way into the hearts of the world people, and this has only come since the communist victory over fascism in the WWII Armageddon, when part of the Scriptural prophecy in Ezekiel, chapters 38 and 39, was fulfilled.

In these channeled writings, in which I am making Michael's stand with the Holy People of the greater World

Israel (the Cosmopolitan World People) and acting as the Christian Comforter and Emmanuel to the Jews, I am to give the truth about all things and let the chips fall where they may. The chips will only fall on those who are prejudged by their own past conditioned reflexes, which cause them to act in evil thought without logic or reason.

There is no logic or reasoning in war. There is military logic applied in the battle, but it should have been applied before the battle. This could be only if there were a strong group of people in every nation with a voice who could give everyone the logic and reasoning of how to solve all problems by applied sharing. No religious eulogies are going to solve any problems unless the people who preach and teach them practice what they preach and teach.

What good does it do to go to church and sit and listen to a sermon about Jesus the savior and about his Father God in heaven, unless it be done on earth as it is in heaven? Actually the meaning of heaven is space. All the energies that support life and planets are in space atoms. Even the suns of solar systems do not generate energies. Microcosms are the only channels of space energies and they carry all the energies that, thru their acts and words spoken, are impregnated into matter atoms and into space atoms. The mental seeds earth people have been and still are sowing in their city, national, and planetary auras are reaping war, crime, disease, and poverty.

If people do not like war, crime, disease and poverty, then why don't they live according to the Universe's natural programming, which is to give and receive instead of buying and selling their daily bread for their own secular needs? Christ Communism has already demonstrated that it is no longer necessary to buy and sell for secular profits; but thru holding all natural resources and industries common, the way is opened to rid the world of war, crime, disease, poverty and all negative effects. So then, why don't you all begin to convert your businesses, industries and institutions into communal property? Begin to make all things free to those who serve without pay.

As the One World Commune grows, millions of people will become members, all giving according to their ability and freely receiving according to need. The commune will enter into all kinds of industries that are part of the needs of a communal people. In no time at all, we will operate air lines, passenger and cargo ships, large hotels, restaurants, resorts, radio and TV stations, department stores, clothing and shoe facets, etc.

No one could compete with us, because we would draw no wages and have no income tax to pay, nor would we pay property tax. The Uni-Godhead has prepared in the US Constitution for us to come forth at this time as Its church, tax free, to

establish Its kingdom over the world.

I'm not presenting the idea that our world commune grows larger as time goes on, and by building communes we win the world in ten, forty or a hundred years. As we see, it has taken the communists over fifty years to reach the prominence they have gained, and they probably believe that by the year 2000 most of the world will have joined into socialism and the threat of war will be gone. Nor am I presenting the idea that the Soviet or Red China Communists will build true communism. The communists do not say much about what communism really is or what it entails in living situations for people. It has been in a dream stage.

But I tell you that in the true communism of our New World Order there will be no money used, nor will there be need for any judiciary, penal or military system. The planet will be totally disarmed. We will learn how to operate as the Universe does. The Universe is sure a big business, but not the kind of business the merchants of the world are in. In a way, the merchants of the world have done fine, but now comes the time in which all kinds of "money business" ends.

During these days, the whole world environment will be set up into industrial schools of creative experiences in which all persons can express their talents according to ability and freely receive according to need. Then in 1335 days we begin to build 12 new pilot model cities that incorporate all the advanced scientific-technological ideas. The things that will open up in scientific-technological ideas will be in themselves so revolutionary that they will make the ways and means of doing things now completely obsolete.

How will we finance these new cities that will act as pilot models of how we will remodel all the old cities and build many new ones? As you can recall of the World War II Armageddon, the industrial nations in Armageddon really got into gear and produced war equipment and furnishings as yet unheard of. So if out of fear they can do all that, then surely out of 'love as service done for all people', and with the advances of technology, the people can do ten times the production they did then towards building the Kingdom of God organization on this planet.

NOT PLAYING FOR PEANUTS

I'm not playing for peanuts, I'm challenging the whole game. How about you? Anyone who just wants to make little social changes that are doing nothing more than putting patches on an old worn-out garment, is not with the Spirit of Truth. Some people will say: "Oh, if this Comforter fellow raises the indignation of the people to the point of truth and action then many people who would have otherwise become righteous if things went on as they are will not have the time

to do so." I say: "Everyone has had almost two thousand years to bring about sharing. Why have so many people waited until this time of the countdown before getting their craft ship-shape and sea worthy?"

The people of this planet have determined their own potential crucifixion. To say that you weren't there when Jesus was crucified is a fib. But it wouldn't have made any difference who was present, because it would have happened in the same way. And it has been happening every day since then. The same church and state regalia that existed then, still exists today. It's worse now than it was then. At least then, people were inquisitive and wanted to talk, but today their so-called minds are already made up with false propaganda and status quo news gossip. This means that most people are so indoctrinated with fables and facsimiles of the truth that they cannot express their natural character, which would rather spit on Imperialism and be lashed than carry its weapons. To me the past is dead and had to be as it was, but now eternity arrives and all things leave 'time' and become eternal.

However, the age is here when we don't have to spit, especially into the wind and have our own spit hit us in the eye. All we have to do is to start having fun telling people who don't know the truth the real truth about all things. It's right here in the EG.

Through our World Wide Buyers' Strike we'll put everyone in the same class. Usury money produces many classes of people. The higher the class, the fewer practical things those people know how to do that really need to be done. The lower classes of people are doing most of the good things that need to be done. For example, how many people know how to clean a house, wash and wax a floor, clean up a bathroom and keep it smelling sweet? How many people can paint a room, varnish the woodwork, clean the brushes and rollers and so on? How many people can fix an electric circuit or the plumbing or use a saw and hammer properly?

What I'm showing you is that when all the superfluous things fall away and we're back to the real chores that need to be done to keep up a beautiful social environment and have all things at our fingertips, then we'll all begin to appreciate the commoners, who can do most anything and do it right because they learned, through doing, how the materials, tools and attitudes of doing a good job go together. We'll discover that most of the "high class" jobs people do that seem to be of high intellect are of "make-believe" people putting in time on roller skates that go up and down empty aisles and through files filled with paper on which is written, "Go right, go left, go to hell, your bill is due."

As the world is now, from the richest to the poorest, the people only have pieces of property and amounts of money. They

are represented by artificial values put on all things. But through the EG's World Master Plan, the world people will bring about one communal class of people over the whole world in which there is no private ownership of property or personal money needed by anyone. Each person calls one place their own, where they shall reside. Each person is free to come and go all over the planet using all means of public transportation, staying at any hotel, eating at any restaurant. All entertainment will be provided by the people's social schools of creative experience, through which all things are produced that are ordered by the people. As our world unity grows, human resources far surpass capital resources. Money can't build the New World Order, but there are unlimited natural resources, energies, industries and, most of all, willing hands to do so, once the world people understand this World Master Plan and then act upon it.

There's an area that I haven't yet fully explained, and it is: "What will stop the reactionaries from starting another global war to herd the world people off to the battlefields in an attempt to stop our World Wide Buyers' Strike?" It's impossible for them to do this. From here on out, and clean on into our New World Order - which comes when the New Covenant-World Bill of Rights is the common law all over the planet, and the only law - all wars will be absolutely controlled letdown of the people's karma. All those who would obey orders to kill given by political groups are simply led off to be killed by the same weapons they live by.

Soldiers, however, do have a recourse in their own being and it is simply in honoring only the truth that is there for those who seek it. No man-made laws can control people who do not fear them and who act in righteousness. But if the world people do not unite to keep the peace and if they are not intelligent enough to refuse to fight for national powers, then who can stop them from fighting their imagined enemy? They are only allowing the negative thoughts they hold, which they keep sowing over and over again, to animate them. They are told that they must divide into opposing groups, then 'kill and maim' each other. Who in their right mind would want to bring a kind of artificial paper peace just to save bodies that go on following orders given by national powers to 'kill their so-called enemy', who is just like themselves? Soldiers who go into battle and do not lay the conditions down themselves as to whether they go to war and for what causes, are simply part of the blind leading the blind, and they will at this time both fall into the ditch.

"The Last War for the World", if it must come, will rid the world of all soldiers of fortune. But, this last war doesn't have to come. The world people of Israel can carry out a real World Wide Passive Resistance Movement, which will offset the last part of Armageddon. In the prophecy about the

New Covenant (Jeremiah 31:31-33), the Lord is the Universal Godhead and I am the servant of the Uni-Godhead, as many of you are also. And I am appointed to speak to the house of Judah and the house of Israel about agreeing to come under the New Covenant-World Bill of Rights. Whether they agree or disagree to come under Its high vision now and be the supporters of our World Wide Passive Resistance Movement-World Wide Buyers' Strike, the remaining part of Scriptural prophecy still can only be fulfilled by people choosing the blessings of radiant spiritual detente or the cursings which take them on into war.

The Uni-Godhead sees this planet only as it has laid out the plan for Its spiritual growth and economy. It tells about the 12 tribes of Israel. Two of them are stable tribes, and they are the US Joseph and the USSR Judah. The Judeo-Christian movement will have to fit into the plan or suffer the consequences of their own erring ways. It's sort of a joke that neither the people who say they are Jews nor those who claim to be Christians have even begun to exemplify the teachings given to them, and neither do most other groups. But we could expect those who say they are Jews and Christians to be the first in the establishing of the Kingdom of God through the ways given to them in the truth of the Everlasting Gospel's World Master Plan.

Jesus prays to the Father to give the spiritual people another Comforter, that he may abide with them forever. "Even the Spirit of Truth; whom the world cannot receive, because it seeth him not, neither knoweth him: but ye know him; for he dwelleth with you, and shall be in you" (St. John 14:16 and 17). Explanation... well, I'm here with the spiritual people and broadcasting telepathically into their heads. Those who seek the Truth and its virtues for all people rise in vibrations into the outer ring of white light in the planet's aura, which is purified and of the synthesis energies, and there they are in telepathic communion with one another, laying the groundwork together for our New Age.

"But the Comforter, which is the Holy Ghost, whom the Father will send in my name, he shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you" (St. John 14:26). Explanation... I must confess that these verses about the Comforter were put into the Scriptures at the time of the King James Revision of the Old and New Testaments. All of the first-line prophecy that I am to reveal and use now was put into the Scriptures in symbols and allegories at different times in the past so that I could reveal them at this time. This was done thru different incarnations here by ETI space beings of the "Galactic Command Space Complex" who are the high beings in charge of this planetary project and are the ones who deliver the harvesters, at the end of the 1290 and 1335 days, into their Heaven on

Earth - a New Order for the Ages or the autonomous state of true Communism.

It is possible to bring these great changes about through a well-planned World Wide Buyers' Strike in as little as 90 days. All we need is a majority of the world people in every segment of society agreeing on this "One Idea" whose time has come and cannot be stopped. It is the Uni-Christ Idea, which is of pure logic and reasoning, which no opposition can stand against or stop thru legalities or police action. The Universal Christ Idea has been like a sleeping beauty that would spring to life in these times and amaze everyone with just common sense, but could not be applied worldwide until now when the Kingdom of God shall be established worldwide. The New World Order we bring is exactly the beauty everyone imagined. Its only 'enemy' is the planet's akashic records, which are filled with the karma that now leads people into war, crime, disease and poverty. The only way to conquer this beast is to stop acting on any data of right and left wing duality. Our thing is for all people and for the sharing of all things right now.

A big world revolution comes in every nation under old world Gentile controls, because the economy of these nations breaks down. And no more nations are left for the capitalists of America to exploit. At last the things Prophet Marx told about for the last days of capitalism are at hand. We are not going to create the revolution. We warn them that the great tribulation is at hand that the Uni-Godhead tells of in the end time as Its Kingdom of God is established over the world. And if the people are not prepared for it, then the Americans will begin to fight among themselves and will at last see they are caught up in a paradox of their own false religions, politics and secularism.

Out of the American karmic cleansing revolution rises the US tribe of Joseph to come forth fulfilling the US destiny mission to all humanity. The vibration, the consciousness of the whole planet, keeps rising so that the US tribe of Joseph does not go into socialism, but into the complete communalizing of all natural resources, industries and institutions. The Soviets and Red China follow suit, and then the whole world comes in.

In the Uni-Godhead's plan for communizing the whole planet, first the World Nation of Israel would rise in Russia. To accomplish this, ETI had to create WWI as a let-down of world karma, so that out of that dilemma the opportunity for Christ Communism to rise in Russia would come. The building up of further karma led to WWII.

Negative karma is caused principally from the buying and selling of merchandise for secular profits, which is caused from usury money: money under interest-bearing notes and taxation. All of this is done with mind energies imparted from

Uni-atoms. The Universe has programmed Its mind atoms, 'It's Spirit', for sharing thru pure giving and receiving. So when the poles of the atoms are reversed in the mind energies flowing back into the electromagnetic field, they build up as heavy, negated atoms. As they build up, the people become more mentally consternated, psychically tired and under paranoia. War usually comes as a release of their paranoia, but during that period, leaders should rise out of the people to give the people the right ways of avoiding wars.

In fact, most of the leaders that did rise were communistically inclined, because the only healing of the problems was to change the economics of the nations preparing for war. Anyway, WWII was inevitable because of built-up karma. So ETI planted Hitler as a Lord of Karma in Germany, and around him the big battle of Armageddon took place, fulfilling the prophecy in Ezekiel, Chapter 38. Nazi-Fascism was created by the International CIA Ring as Gog's army, that would move up against the USSR Mountain of Israel. The CIA had planned to bring the US into the war allied with Germany, Italy and Japan. But Gog (the demagogues) really did have hooks put into their jaws, because ETI moved the Roosevelt Administration into the US government and turned CIA plans around so that at last the US Israel people allied with the USSR. Also, Hitler was a psychic terminal thru whose body ETI screwed up the plans of Gog's generals.

Read Ezekiel, Chapter 39, and it tells that there would be a sixth part of Gog's Army left after Gog was turned back by the Israel Army, the Soviet Red Army. In the meantime, the Roosevelt administration had all but disappeared, and the sixth part of Gog's Army rose in the US, led by the CIA. Then ETI led Gog to strike in Korea and Vietnam. Now why would ETI space beings have this happen? They see the future great karmic calamity that's coming over the whole planet that would end all life. They receive cybernetics from the Universal Mind, which is all-knowing to them. So they know what they must do. To them there is no death and there never has been, so they are not concerned about people killing themselves, because it's perfectly obvious the people don't have to kill themselves with weapons, commercial food, wrong work, etc.

Dr. Raymond A. Moody, Jr., an ETI channel, writes the book *Life After Death?* with testimonies of hundreds of people that returned from so-called death. Many ETI channels are giving the people the truth that has been kept from them by the Gentile "powers that be." The truth that is coming now is so dynamic that everyone might just as well junk everything of the past and begin to learn all things anew.

The akashic records - this civilization's collective consciousness from which all people draw thought that animates them according to their karma - is all screwed up. The money people, the affluent set, control the people with laws and

have perverted their conscience in false moral taboos, religions, etc.

All that I'm telling you only shows how deep the gap is between the status quo and what actually has to be done here - which shall be done. The Universe is the intelligence. There isn't enough actual intelligence used by the status quo set to fill a paper bag. Yet in the twinkling of an eye, all the perversions, errors and wrong thought the people are under could be taken away and they would be free.

This comes as the Uni-Godhead is forced to make a great sacrifice of Magog - the same city that Rev. 18:10 tells of, which is New York City. New York is the city of the Babylon Stock Exchange from which the Gentile nations are suspended under bank loans and taxation that is controlled by the world bankers who oppose Socialism, which is destined to turn to Christ Communism and communalize the world.

EXPOSING "SECRET CHAMBER"

Mae Brussel, an ETI channel, is part of the telepathic crew that is exposing the secret chamber of the red dragon (Rev. 12:3,4), the world forces of usury money who are antithesis to the socialist thesis. In her book *Beyond The Call of Duty*, the CIA is exposed as being responsible for 30 Watergate witnesses who met violent or circumspect deaths. Among the victims are Martha Mitchell, first to point the finger at Nixon. Then Lyndon B. Johnson, who was quoted as saying: "We've been running a damn Murder Inc. in the Caribbean." And there was Sam Giancana, the Mafia chief who had ties with E. Howard Hunt and the CIA; Mrs. E. Howard Hunt, the wife of one of the plumbers; J. Edgar Hoover, who knew about White House dirty tricks; Hale Boggs, who died in a plane crash and had startling revelations on Watergate; and Congressman Wilbur Mills, who died in apparent suicide. Not only these, but hundreds of others all over the world in these latter days have met violent death because the International CIA Ring, the scout troops for the Old World Bankers, feared them.

Now surely the CIA covert operations can see, as the unfolding karmic drama plays itself out, that they are playing a losing game with their operations all over the planet, which try to rally the people into another big war to destroy socialism, the system that took away usury money and private property in Russia.

And as prophecy tells, more and more people are turning their face against Gog (demagoguery). All those people who mysteriously died were all part of the karmic game. They all believed in what is called legal justice, which is, of course, a fantasy and has never rendered justice - not even to Jesus.

We have the paradox of Christian Churches, who should be

up front with the Revolutionary Jesus and putting the money-changers out, but instead in are the fantasy of going to heaven. And on the other hand, we have all these affluent Americans who didn't know how to put on the full armor of the Uni-Godhead and turn Gog's operations into a pillar of light. They are all playing status quo payday parts in the same erroneous games. Some are right of center and some are left of center. They're supposed to be in their Uni-center serving humanity. The tide goes out and the tide comes in. They are just the tide, but could have been with the power that operates the tide.

I'm telling you all these things to turn you on to the greater realities of ETI, so that at last you'll see that the Gentiles I speak of and the Israel people are not a set denomination. People are Gentiles when they play money games for secular self and are of Christ Consciousness when they work for the liberation of all people. Now's the time to come out of Babylon!

But the course of Judaism-Zionism, the power elite which is divided against itself as to what they will do, is determined by what it takes to create the world Synthesis. In other words, legal games are nothing more than accessories to the error most White House people are in. To tell the truth is not to accuse anyone or try them for crimes. "Judge not, for with what judgement ye judge, ye shall be judged." Help, love and lift everyone by helping to build the Kingdom of God now.

Let me explain. It's easy to see that the world is divided against itself into antithesis versus thesis, which is industrial owners versus workers, or capitalism versus socialism. But they are of the opposite poles of atoms and are evolving one upon the other to synthesize into the Kingdom of God. And as I keep reminding everyone, the Kingdom of God automatically comes in, either thru people uniting to bring it about thru passive resistance-legal civil disobedience, or thru "the last war for the world."

Now get this... the Synthesis is all an energy thing. It's all a consciousness that people receive at this time when the Uni-Godhead is furnishing the PSI energies to give the people a new heart and mind. Those people will come out of this old dying world order in mind and begin to build the New World Movement that will lay the proper foundation to heal the planet of all its perversions at one time.

WORLD DÉTENTE

The word detente has arrived on the world scene. It means, can the opposing world forces, of themselves, create the kind of spiritual good will between them that will cause them to synthesize together? It's like saying, "How can Satan cast out Satan?" Satan is negated mind energies. The air is filled with

static that confuses anyone who isn't in their Christ center. The kind of good will I'm speaking of isn't of armament reductions and controls and trade agreements. This was only the beginning of semi-intelligent communications. I'm talking about a special kind of forthright detente that talks about one world, one people, holding all things common, dissolving all national boundaries, and sharing all things.

Absolute freedom, security and abundance for everyone - this is real Universal Intelligence. Instead of legally trying to expose the CIA, just come together and tell them what they are doing that's wrong, and they'll tell their opposition what they believe those who oppose them are doing that's wrong. In such a meeting, both sides, face to face, would be humbled to face the same problems, which are those of feeding, housing, clothing, furnishing care, recreation, transportation, communications and utilities for all people. They would see that neither side has the complete answers, but that I have. So then they would begin to love me and serve me as I have loved and served them. And I don't mean that they should worship me or praise me. I am just one of my people, all of us working together as a team and all having special abilities that, when harmonized together, can create the real life that is fulfilling for everyone.

Imagine top level conferences where national leaders come together and talk about world affairs that concern all people. Obviously they now think real goals for all humanity are not obtainable. So they talk about little patches on an old worn-out garment, believing that people are what they seem to be at the level they are operating under - that which is their status.

There's nothing wrong with the minds of people at all! The only thing that's wrong with people is that they are enslaved under an old-world-order, status quo consciousness, which is so far away from the truth-realities of the Universe, Its nature and creative life force, that naturally, thru their associations with living experiences, nearly everyone would judge themselves according to their mortal minded "thinking" about things - not being aware of the Uni-Godhead's truths, which are given to bring tranquility and peaceful progress among the people. The church of the Uni-Godhead has risen out of the people, and whether anyone likes it or not, it is self-evident and is the World Communist Movement. The world is already potentially delivered in their hands. When ETI space beings show the whole world, which they soon will, that they have control over all nuclear weapons, then those under the cyborg beast of capitalistic effects will see that they can no longer create an army to stop Christ Communism. Their nuclear weapons will only be used on themselves.

With the fear of nuclear war gone, the great Army of Israel that keeps rising out of the democratic people of every

nation can easily take over the world - not to politically socialize it, but to occupy every institution and industry and convert them into communes. Thousands of new office buildings will be vacant because business as usual ends. They can be converted into communal living quarters and recreational centers for the people. All the armies that demagogues try to organize to stop the Israel army of the World People will turn against them, and instead of soldiers shooting at soldiers, they will be shooting at politicians and business people.

The status quo governments have only been able to maintain out of fear of duress and legal action against the soldiers. But now the fear barrier breaks and the status quo legal system all falls apart. It has become a big business that keeps judges, lawyers, bondsmen, etc., employed by using the people as guinea pigs.

I'm not trying to encourage this. I'm telling you what will happen if people don't unite. A good place to start unity is in the churches. The churches belong to the people and to the Uni-Godhead. So all people need to do is go into their neighborhood church with the Everlasting Gospel - the book that fulfills all religions and their Bibles - and set up food conspiracies. Begin to raise free food on every available patch of land. You will be the government of the Uni-Godhead that's in your hearts and heads. Begin to make plans for half the people to start traveling over the world to help other people in need.

The Uni-Godhead's people do all this thru super imagination and by speaking the words that sound in space and begin to manifest real freedom, security and abundance for all people. First you imagine the kind of perfect world you want. Then you talk about it to everyone. You publish it and circulate the "World Master Plan." Then, as if by magic, you find yourselves in the actual doing of it. All things will come under the Uni-Government of the omnipresent Universal Mind. So get ready to utilize transportation, hotels, resorts, dining places, etc. Do it now. Tomorrow will be too late to offset a terrible tribulation.

The fantastic discovery (it's not really a discovery but a fact that has always existed) is that people can't have Uni-Intelligence until they can experience Life. Socialism has been led to do two things. First, to show that a workers' collective will work and can produce a greater abundance for everyone than could ever be produced under secular usury money; and second, to create the army that could withstand the automatic onslaught that would come to those who change status quo money and private economics.

When socialism (the World Nation of Israel) had accomplished this - and they have - then their world communist mission would come. That time is now. Naturally, they desire to do this thru peaceful trade and friendship, supposedly

believing that the people under capitalistic effects would vote in socialism and then the whole world would have peace and move on into communism. This is an unrealistic dream, because there never can be communism until people live it first and record its experiences for recall to have consciousness to carry them on into its essence. There are real dreams in action and there are daydreams of fantasies.

THE UNIVERSE'S PERFECTION

It would appear that earth people have been in evolution and are evolving towards higher goals. But it is science and technology that have carried the people into the higher goals of abundance for everyone. Now the status quo world must be dissolved to use the workers' technology for everyone. It would appear that scientists are discovering new ways and means, but actually their sub-conscious past memory that was and still is in error is returning as they pursue materiality. And if the Universe, thru Its local atoms and Its ETI command, didn't have the ways of keeping them from lapsing right on over into their past errors again, they would. In fact, they already are. The facts are that the atomic programming of the Universe is already perfect, and what science calls the "brain" is nothing more than a storage battery that absorbs cosmic juice to give a person their kinetic charge of electricity to operate their sensory electronic equipment.

People get paid for thinking and not knowing. People can't get paid for knowing and affirming - only thinking! Thinking is only the past. The past is already gone. Uni-energies only flow forward. When one thinks, one is working back thru a swamp to finish an experience that was never satisfactorily completed. Everything that happens is omnipresent with the moment. It extends backwards and forward from the place you are in, mentally and psychically. In knowing this, you don't have to let yin and yang (right and left wing thought) carry you in a reverie up and down the line, so that all you have is another mental trip and can't do the real task at hand.

Take me, for instance - ha! I believe I am the Cosmic Messiah that has come to fulfill the Uni-Godhead's promise to all humanity and that can know all the things that need to be known to build the perfect order here. I don't see any limitations to prevent the planet from going around the sun, and so it is with changing the world. Now, why don't you believe in yourself - that with the energies of the Universe, you can do all things, the order of which is perfect?

To plant some seeds you make a little ditch in soil, put the seed in the ground, cover it up, keep the soil moist and they grow. Now if you start thinking you're important to this process that is already Universally established, you miss the whole point, the experience and the happiness of it. Just

being associated with seeds already made, air already made and sunshine already made, etc., is the point. In the process there is nothing to be proud about or in fear of. Without even taking thought of the thing, you were led to experience planting seeds. And so it is with everything that's made, or so-called invented. All the people that commercialize on what they call their inventions are creating nothing but degeneration and death. They commercialize because they are under usury money. They are under usury money because they are secular in their ways. This is defeating them, and their secular ways created an economy that corresponds to their secular end - secular politics, secular religion, secular money, secular home and business, secular wife, secular children.

Happiness is in being free to fulfill desires. Most dreams or desires people want to fulfill are positive. They want to go places and do things. They want to have companions and romance. They want to sing, dance and play. They want to express their talents. In our New World, people will be able to do all things in perfection.

But the money-changers have taught society that they cannot do any of these things. The people who make lots of money can pay to have books written, and the writers that get paid know they can't get paid unless they write the stories like the 'money people' want them written: that is, so the stories in no way expose their guises. They don't care if the writer goes to the extremes of left and right: but if he writes from the center and shows what the right and left is, then his writings never make the big commercial distribution.

Our etheric body is an electronic organism, and the intelligence is in atoms. Thought radiates from all things, and our sensory organism is the open channel thru which already-created thought or imagining is traveling and animating us - operating our entire facility of awareness.

There are no wars, crimes, mental and physical illnesses and poverty as social scientists study these things. These negative effects are all manifesting from wrong use of mental force. So all scientists study effects, not knowing that they are part of the cause of them.

Under a usury money system, the lesser evolved people will rise to the top to control the world thru laws, money, police, courts and soldiers. But this is relative to all people. The purpose of this planetary project has been to restore spaced-out entities into the Universal Family, and in order to do this effectively, a social structure would have to be set up.

Uni-Godhead gave money atonement to begin the subduing of the world, meaning to start the people down the road of developing the potential elements and energies of the planet, which would lead to science and technology, and the expanding of knowledge, words and consciousness. From money atonement,

the worst that could come would be that money would become the thing in itself, which it did. Things got turned around backwards. Money should have worked for the people, producing happiness. But even this was relative to the healing of the etheric body of the entities of this project, who are being rewired here.

You'll not understand what's happening here unless you can pick up telepathically on what's going on in eternity all about this planet. There are millions of planets in our local Uni, all having space transportation between them. All the entities are in eternal bodies, and all of them have gone right on down the main highway to be given the dynadran principle of getting unlimited energies out of the electromagnetic field, which is always cycling-recycling.

I'm just giving you a glimpse of what's really happening in our local Uni and what will come to pass here. In earth science there is distance, time, weight, inertia, etc., all of which apply to building and mechanics - but not to the Uni. Naturally, if you're trying to *push* yourself out into space, instead of using the energies already in the neutron centers of space atoms, which aren't pushing and pulling; then you've got time and not eternity. Time is running out!

A people can't change their mind when they start down the wrong road on ETI project planets like this one, because the mental seeds they are sowing into their planet's akashic records play back to automatically carry them on. Their mind is in their planet's aura, recorded in the molecular structure of matter atoms and space atoms. Matter atoms record the dialectics of our experiences with material things.
